Dorothy's Mother Proves Claim

a rich, concentrated food. It's pure, wholesome, sweet to the taste and sweet in your child's little stomach. It builds up and strengthens weak, puny, underweight children, makes them eat heartly, brings the roses back to their cheeks, makes them playful, energetic, full of life. And billious, headachy, constipated, feverish, fretful baby or child ever failed to respond to the gentle influence of California Fig Syrup on their little bowels. It starts lazy bowels quick, cleans them out thoroughly. tones and strengthens them so they continue to act normally, of their own accord.

Millions of mothers know about California Fig Syrup from experience. A Western mother, Mrs. J. G. Moore, 119 Cliff Ave., San Antonio, Texas, says: "California Fig Syrup is certainly all that's claimed for it. I have proved that with my little Doro-She was a bottle baby and very thy. delicate. Her bowels were weak. I started her on Fig Syrup when she was a few months old and it regulated her, quick. I have used it with her ever since for colds and every little set-back and her wonderful condition tells better than words how it Don't be imposed on. See that the

Fig Syrup you buy bears the name, "California" so you'll get the genu-ine, famous for 50 years.

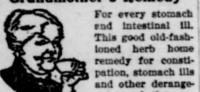

World's Gold

If all the gold produced in the world since Columbus set forth on his voyage more than four centuries ago were cast into a solid cube it would be only 88.5 feet each way, according to estimates by the bureau of mines.

This would represent only slightly more than a billion ounces, which, at the prevailing price of \$20 an sunce would make a sum not beyond the purchasing power of a mere handful of the richest men in the world.

More than half of the total of gold produced was mined in the first twenty-seven years of the present century. -Washington Star.

She climbed to the studio, and counted her store "Why, you little devil !" he ejacuof dimes. She looked at her com plicated page of multiplication and addition. She sat for a long time. figuring, thinking. Obviously, Marjory and the rich ness of a wealthy hushand were to be denied them as succor Marjory was

forever lost to her plans for the future. All the years of washing dishes for the sake of Marjory's hands had been in vain. All her dreams of a romantic figure breezing mysteriously into their commonplace circle were dissipated into thin air. Ginger was practical enough to admit defeat when she met it, and Marjory was her Waterloo. Marjory, beautiful peach-bloom Marjory would marry a minister, and her future would be that of catering to a Meth odist church, and a parsonage mini-

mum of three. In that hour, Ginger I'lla rose to great heights of renunciation. She relinquished all her dreams of fortune, of fame, of social supremacy for her beautiful sister. She would be satisfied to see her merely happy She smiled. She went down the wabbly ladder without a moment's pause, for her decision was made. She knocked at the door of her father's room, now occupied by Hiram

Silence prevailed within. Ginger knocked again.

"Poor father." mourned Ginger He opened the door with ne hand s he struggled into his coat with the

lated irrever atly, and flung her roughly out of his way. "She's still in the hammock," called

Ginger meekly. Then she went immediately to bed. She wept for a while, softly, for it is natural that youth should abandon its dreams and its expectations of great riches with reluctance. But in the end she smilled, and stiffened her silm little shoulders beneath the white sheets. Very well, then. Plainly the future of the entire household devolved upon her, and her alone. "Selah," she whispered into the darkness.

CHAPTER IX

A great peace, a sort of subdued grandeur, descended upon the turbulent spirit of Ginger Ella, for she had schooled herself to accept life as it is, and mold it to her own pattern as opportunity came. That the opportunity would never come now. as concerned Marjory, she was well aware, but without resentment. After all, perhaps one had no right to at tempt to mold human lives, free souls. like herself. As for Miriam and the grocery clerk, she yet had bot of Alexander Murdock was leaving on this very day, and Ginger did not for a moment believe that the sensible twin was so deeply interested as to disqualify her for interest in more intriguing figures-granted the ap

pearance of such figures. Get her away--that was the best method. Ginger was adjusting herself to a new impression of the sensible twin. So still she had always seemed, so subtly impenetrable, that in contrast with Marjory's radiance she had appeared more of a liability than anything else. But there was something strange about Miriam. Ginger did not understand it. She remembered how Tub Andrews, even in the gorgeous presence of Marjory arrayed for the beauty pageant, had succumbed to Miriam's stillness. She remembered how Alexander Murdock. a mere grocer, of course, but still no doubt possessive of the usual male inclinations, had passed over Marjory a passing cordiality, to plant immovably at the un-dancing htmself feet of Miriam. Strange about her! Strange about everything. Ginger thought

"The world," she concluded largely. 'it all gone .seebee jeebee. The grocers grovel to brains, and the preachers

pick beauty. It's all wrong." But perhaps when the twins found themselves away from the confining familiarities of Red Thrush, away among strangers, at the normal school -with clothes that became girls of their profession, and their looksclothes paid for from contributions to the home for the blind- But another annoying thought arose to dis-

turb the even tenor of her plans. At the normal school they would meet only teachers-primary teach ers, teachers of geography, teachers of Latin, English and algebra. GinThat Is Economical to Build

Comfortable, Attractive Home

Here is a little cottage which seems to typify the spirit of home. Its story-and-a-half construction has been designed to produce a charming out ward appearance and the interior will be found equally satisfactory.

By W. A. RADFORD

By W. A. RADFORD Mr. William A. Radford will answer questions and give advice FilEE OF COST on all subjects pertaining to practical home building, for the read-ers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on all these sub-jects. Address all inquiries to William A. Radford, No. 407 South Dearborn Street, Chicago, IIL, and only loclose two-cent stamp for reply.

Something more than a monetary investment is required to make a house a home. Small houses that do not cost much comparatively can be made, through proper design, to be more homelike than some in which the investment is considerably greater. This happy result is secured through the proper selection of the home building design with relation to the lot upon which it is to be built and to its surroundings.

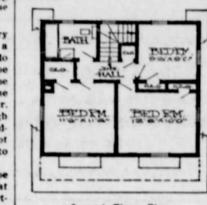

The house illustrated is of a type which is economical to build and at the same time provides a comfortable, attractive home. Set in rural surroundings with lawn, shrubs. flow ers and trees, the owner will have a me of which he may well be prou-

KITCHEN LIVINGTM DININGTM TORCH

and at the same time he and his fam ily will have a comfortable abode. As will be seen, this is a small frame house 26 feet wide and 20 feet deep. Much of its attractiveness can be attributed to the set-in porch dor

the front. The latter adds considerable space to the second floor and permits bedrooms that are light and well ventilated.

How the six rooms contained in this house are arranged and the size of each room are shown on the floor plans which accompany the exterior

Second Floor Plan

view. The set-in porch leads into the living room which occupies the right side of the house. The dining room is built out flush with the porch floor and with multiple windows at the front and a large window at the side makes a sunny, airy place for the family to dine.

The kitchen also is of good size, being 12 feet by 12 feet. The stairs to the second floor are open and run out of one corner at the rear of the living room. The stairs end in a central hall on the second floor off of which are three bedrooms, all corner rooms, and the bathroom.

The floor plans show that the foundation walls of the house are straight, which means economy and provides a basement of practically the same size as the house itself.

For those prospective home builders who are looking for a neat, attractive house, which is large enough to accommodate a good-sized family and which may be built at the minimum of cost, this design should appeal conmer and the projection in the roof at i siderably.

No Use

"I tell ye, Hiram, we don't want this Salome opery to play Plunkville." "But they will cut out all the objectionable features."

"Then what's the use of having it play our town?"

It is easier to try to look intelligent than it is to deliver the goods.

4

W. N. U., FORTLAND, NO. 2-1930.

"You can't stay tonight. Tub." said Marjory, with a smile warm enough to soften her dismissal. "I have to send you right straight nome. I have been under the weather for a day or two. and Miss Jenkins didn't want me to to to church at all. She has ordered

ne to bed." Tub, complaining icudly, submitted perforce to this ejection, and sauntered tway, whistling ingubriously. Marjory still clung to her sister's hand.

"Ginger, walt a minute. Sh! Don't iet him hear you. Let's sit in the hammock s while."

They sat down, huddled together and waited in silence until he sound of Tub's footstens, and Cub's whistling subsided into the darkness "Ginger I want to ask you something. Will you just sit here with me and talk until-Mr. Buckworth comes home? And Ginger. If se comes over and sits down-he siways dows, you knowwould you mind-would you just as lief- You wouldn't mind, would rou_"

"Go to bed. you mean?" "Well, you see, Ginger, I want to ask him about something." "I see. I'm to talk my head off und!

he gets here. and then I'm to go to bed."

Marjory squeezed het arm about her sister's walst.

"Yon see- Well, you see, Ginger It is like this. You remember that night when you crept downstairshow long ago it seems !-- and he had his arm around me. Well, Ginger, I didn't care a bit because you saw it. It didn't make any difference to me But I think it embarrassed him, or made him angry, or something for he hasn't so much as looked at .ne since." "I see," said Ginger dully

"I want to tell him that you-you didn't think a thing of it-a little thing like that. I think maybe be thinks I feel had about it." "You don't. do you?"

"No." Marjory's voice sank to s whisper, "Not a bit I like him." So the two girls sat, and waited and presently from the church, they beard the two men. coming slowly talking as they walked Marjory clung to Ginger's hand, and held her breath At the end of the flagstone path they stood for a while before they said good night and parted

"Y-you talk," whispered Marjory. Ginger talked. 'I think it's such a silly name for a farm," spud Ginger "Just like Eddy Jackson. Who else would do such a dumb thing? Pay Dirt. Everybody knows a farm is nothing but dirt, and if it didn't pay nobody would farm it Oh, hello, Mr Buckworth Home so soon? It's lovely tonight. Won't you come and talk to us?"

"Not tonight, thanks, I am tired. Pleasant dreams." And he passed in side

didn't say Marjory was engagedexactly-" "No. You merely said it was understood.

"Ginger, What Do You Mean? Is

Marjory Engaged, or Isn't She?"

other. Ginger, all uninvited, stepped

"Mr. Buckworth," she began gently.

"I was just going to bed," he 'n

"You misunderstood what I told

"But I didn't mean a man. I meant money." "Money?" He was entirely puzzled.

"Yes. You see, we have always been so very hard up. Father did not go to seminary as you did-he didn't even go to college. He only gets about as much money now after all these years as you will get at the very start. And it takes so much for his eyes, and the furniture is simply failing to pieces, and you can see yourself we haven't any clothes." "Yes, I know, Ginger." he said not without sympathy. "But what has that to do with-her? "She is so beautiful. So we noturally decided that she had better marry a millionaire. You must ad mit she's got the looks for it." "Ginger, what do you mean? Is Marjory engaged, or isn't she?" "Not engaged-not exactly. But it was all understood-we talked it over and we ill agreed-we girls did. that is, father just laughed at us-that

Ant-Killer Uses Pincers for Grinding Its Victims

life are to be found many that tax the credibility. One is a creature only about three inches long which bears a superficial resemblance to the spider and also to both the scorpion and the vinegerone. Frequently it is mistaken for one of these, but its correct pseu donym is ant-killer, a name the impli cations of which are fully borne out by its behavior toward these little in-

sects. Its reason, writes C. T. Reed in Nature Magazine, for klilling the ants, and nearly all the other small animals, chiefly arthropodans, is not pure love of destruction.

After killing the insects it thoroughis grinds the bodies in its powerful and needle-like chelae, which project forward in front of the small head Then through a toothless mouth. scarcely bigger than a small pinhead. it sucks the julces from the bodies of the sictims. The ant-killer is dreaded by the

Bee Keeping in Book Form

The Miller fibrary of the University of Wisconsin has one of the most com plete collections in the world relating to bee keeping both in the shape of books and historic material. This in stitution has been recently made the recipient of a straw "skep." a type of beehive which is now only occasionalty seen in old pictures. This particular skep or beehive was made on May 29 1848, the day Wisconsin was declared a state, by D. D. Danniher, a Madison beekeeper, who spent that day in mak ing a straw skep in which to quarter a colony of his bees, and he kept the

ger sighed. If w it was the best they could manage this year-what with the operation. and the retirement on pension. Be sides. If an embryonic teacher could supplant the can grocer in Miriam's heart, no doubt a little inter on, the new conqueror could also be conquered by, say, an embryonic dnan cier. She must hope for the best. As for Marjory-Marjory, whose beauty, and whose married fortune were now forever denied them, why should they, from their limited funds. provide the money to send Marjory to normal to study to be a teacher, when she would be no teacher? Why learn pedagogy, when all her future held was the accommodation of her person

to missionary societies, and indies aids, and the minimum of three? The finger of relentless logic pointed in inother way. Let Marjory prepare herself for keeping a parsonage by keeping a parsonage-their own. She could take Miriam's place as servitor to their father, thus leaving Ginger free for her own further schooling and for the conduct of her favorite charity. (TO RE CONTINUED)

Among the myriad forms of animal | Mexicans as an enemy more venomous than the rattlesnake. As a matter of fact, it has no venom and is harmless,

except for the rather painful wound that it might inflict with its sharp. strong, formic acid-covered pincers. These large spider-like animals are widely distributed throughout arid tropical and semitropical regions.

Branding Sheep

Sheep are branded with paint and not with hot irons as cattle are. The fleece grows out so that hot-irot brandings would be covered up. Sheep must be branded every time they are fleeced. The branding of sheep h more common in the range countries than in the farm states, as sheep are usually kept under fence on farms and there is not much need of brand ing. Special branding paint should be used instead of just any kind of tai or barn paint, so as to reduce to a minimum the trouble of scouring the wool. Manufacturers prefer that the brand be placed on sheep where the

wool is of the least value, such a on top of the rump.

Speed of Fastest Birds

Swallows thy at the rate of more than 100 miles an hour and are amony the world's fastest birds, says Popula: Mechanics Magazine. The pums b reputed to be one of the swiftest wild animals and whippets hold most a the speed records among domesticated animals. Race horses often attain 1 speed of well over 1,000 yards a min | And in this modern trend to billiard ute, while pigeons have been times rooms and children's rooms in the baseute ba abent spurts.

Garage Floor Can Be

First Floor Plan.

Built by the Owner The man who owns a car and doesn't have a concrete floor in his garage can easily build one himself in his

spare hours. So indispensable has this type of floor become in the care of the automobile that few garages are now built without them. Concrete makes an ideal garage floor. It is waterproof and ollproof, easy to keep clean, will not rot, is easy on tires and it never wears out.

In building the floor all the soil should be excavated about six inches below the level intended for the top of the floor. If it is necessary to fill in at any low spots, care should be taken to tamp the new loose earth firmly so that the floor will have a good solid foundation,

Provision should be made for drain age, either to a sewer or low ground The floor should slope to the center or to a gutter at the front or back. If the drain is made at the center, a sand trap should be built about one foot square and ten or twelve inches deep and covered with a heavy screen The sewer outlet is placed in the side of the trap about six inches from the bottom. This trap provides a place for sand and mud to settle and prevents clogging of the sewer. The accumulated sand can be removed with a shovel from time to time.

The floor should be given plenty of slope toward the drain so that water will run off freely. One-Inch slope to ten feet is recommended. It will usually be found satisfactory to build the floor in sections that are small enough to be finished easily. Strips concrete laid alternately permit the builder to work easily from both with sandpaper. Subsequent treatment sides and obviate the necessity of his is the same as for new work,

Brick Basement Walls

Have Strong Points The value of using for brick basement walls is fast becoming understood. There are three types of basement wall material-stone, concrete and brick. If obtainable, stone is used In some districts. Concrete has been advertised and expldited extensively as a very satisfactory basement wall material.

The simplicity of brickwork is said to eliminate the expense of additional machinery and equipment for runways, falsework, etc. It only takes a few days for two bricklayers and one inborer to build the brick basement walls of a home, reducing the cost of labor and supervision. Erick base-

ments are strong. They resist sudden moisture. In some sections the soil is rich in alkall. Brick entirely resists its disintegrating effect.

Brick basements attract home buy ers, for they instinctively feel that brick is safer, dryer, and stronger. at speeds of nearly 2.800 yards a min ment, brick stands out as the ideal i erly pitched and of good size

doing the job all at one time. Two by sixes, place on edge, may be used for the forms and should be staked securely in place with the top leveled to the intended surface of the concrete.

The concrete should be mixed one part portland cement to two parts clean sand and four parts crushed stone or washed pebbles. All parts should be mixed thoroughly with just enough water to make a quaky, jellylike mixture.

As soon as the concrete has been placed in the forms it should be struck off with a straight-edged board and finished by smoothing off with a wooden float or trowel This will give an even, gritty surface Metal troweling is not advisable, since it gives a surface that is too smooth. When the concrete has hardened enough to re-

sist finger impressions it should be covered with earth or straw and keps damp for a week or more by sprinkling. This curing is important, since concrete does not attain its maximum strength if allowed to dry out.

For each 100 square feet of surface, 6 inches thick, you will need 11% sarks of cement, 23 cubic feet of sand tons, and 45 cubic feet of crushed stone or pebbles.

Clean Walls Before Applying New Paint

In the case of repainting, the walls must be thoroughly cleansed and then rinsed with clean water. If formerly painted or calcimined, they should be brushed with a wire brush to remove all loose particles. In any event, the results will be more assuredly satisfactory if the surface is gone over

material for background-an unexcelled surface for rugs, pictures, and other decorative paraphernalia.

Modern Fixtures Make Small Home Popular

This is the day of the small house planned for comfort and convenience. not for ostentation. Heating and refrigeration plants, the electrical equipment, the plumbing system and the built-in features have contributed to place a star of the little house in the ascendancy and to create for it an important and distinctive place in modern life.

Improper Drainage Makes Damp Cellars

Damp basements are caused chiefly by improper surface water drainage and leaking down spouts. The soll should be pitched away from the building. Down spots should be connected to the sewer or should empty out upon cement splash blocks prop-
