**SUGGEST RATIONS TO LOWER COSTS**

**Use Wheat, Barley and Oats in Feeding Cows.**

Dairymen can cut feed costs by substituting wheat, barley, and oats for corn and hominy feed in dairy rations, at present prices, and by feeding a grain mixture with a protein content that corresponds to the roughage fed, advises Prof. F. B. Morrison, head of the department of animal husbandry at the New York State College of Agriculture. He suggests formulas for use with various types of roughage for feeding dairy cows.

In these formulas wheat or barley may be used, depending on the local prices. For dairy cows these grains have substantially the same value, ton for ton. Since wheat is a heavy, concentrated feed, it is best not to use more than 600 pounds of ground wheat per ton of dairy feed. Also some bulky feed, like oats or wheat bran, should be included in the mixture.

Ground rye may be substituted for wheat or barley in these formulas. Since rye is usually not quite as palatable as these grains, it is best not to use more than 300 to 500 pounds of rye per ton of feed.

When little or no legume hay is used, feed a 24 per cent total protein mixture, as: 300 pounds of ground wheat or barley; 300 pounds of ground oats; 350 pounds of wheat bran; 350

pounds of gluten feed; 400 pounds of cottonseed meal; 200 pounds of linseed meal, and 100 pounds of gluten meal.

With mixed clover and timothy hay and corn silage use a 20 per cent total protein feed, as: 600 pounds of ground wheat or barley; 600 pounds of ground oats; 300 pounds of gluten feed; 200 pounds of cottonseed meal; 200 pounds of linseed meal; and 100 pounds of soy bean meal or gluten meal. With clover hay and corn silage only 18 per cent total protein is needed in the grain mixture, made as follows: 700 pounds of barley or wheat; 700 pounds of oats; 200 pounds of gluten feed; 200 pounds of linseed meal, and 200 pounds of cottonseed meal.

With alfalfa hay and corn silage the grain mixture can be reduced to 16 per cent total protein, containing: 800 pounds of ground barley or wheat and barley; 800 pounds of ground oats; 200 pounds of gluten feed; 100 pounds of linseed meal; and 100 pounds of cottonseed meal.

Mrs. F. A. Smith of Kalama, Wash., visited here Tuesday with her daughter, Mrs. E. M. Keith and family.

**Save time and avoid hard work... for 20 cents a week**

No woman within reach of electric current can afford to wear herself out over a wash-board and tub and hand wringer—when an electric washer actually cleans better and costs only a few cents a week to operate.

Perhaps the children or the home garden may deserve more of your time. There are so many things that you really want to do. An electric

ironer will save hours. You can sit at the work while it quickly does the large, straight pieces as well as the small ones—no carrying of six-pound sadirons.

Or an electric iron will relieve much of the old drudgery. All these time- and labor-saving devices are inexpensive to buy and ready to serve you at the touch of a switch.
