OWYHEE Irrigation District and The Proposed High Line Ditch

The Owyhee Irrigation District owns and operates 157,000 acres of land. The first advantage that this will be the ability to control the construction work started this month. The actual power work will start with the sale of the power sales contract and be completed in the fall. The construction work on the irrigation system was increased by the sale of the irrigation system to the district.

The second advantage that this will be the ability to control the construction work started this month. The actual power work will start with the sale of the power sales contract and be completed in the fall. The construction work on the irrigation system was increased by the sale of the irrigation system to the district.

What Everyone Wants

is Money, and what everyone can Save is Money. If they have any money, they should work to deal, where to buy cheaply, without sacrificing anything in the way of quality. We offer each a purchase to the public, with the assurance that all our goods are the Dependable End, which we will— and do— Positively assure. If you buy from us once we will be able to count you as a regular patron afterwards.
