

ONTARIO AND HER FUTURE PROSPECTS

are that this section will produce, and this means a junction point for them here also.

Agricultural and Horticultural Region.

Surrounding Ontario is one of the greatest agricultural and horticultural regions in the West. Within sixty miles of it as a center there is eight hundred thousand acres of land that is under irrigation and under projects to water it. Allowing twenty acres to a family and this is ample for their support, forty thousand families, or a population of two hundred thousand people will be living on farms within sixty miles of Ontario. This alone would build it into a city of fifty thousand inhabitants, but in addition to the irrigated lands there are thousands of acres of lands that will dry farm successfully, as well as great bodies of timber along the Payette and other streams that must be shipped to Ontario. A great mineral country also will be tapped by these branch lines from Ontario on the upper reaches of the Payette and other streams and this must also be hauled here. This mineral country has only been waiting transportation and the report of the state engineer shows immense bodies of ore that can be shipped when these railroads are in operation.

Immense Water Supply Here.

There are streams on every side of Ontario where electrical power can be generated cheaply and we shall always be able to furnish an unlimited supply for manufacturing and irrigation purposes. Power lines are now built through nearly every valley in this section.

Ontario Future Large Market Center

A few years will see immense warehouses, elevators, cold storage plants, fruit packing houses, creameries, canneries and many other big enterprises at Ontario. The product of this immediate territory will be on such a large scale that Ontario will be one of the biggest market centers in the west. Consider that now there are seventy thousand acres within the sixty mile circle planted to fruit and that this area will be doubled within the next three years and think of what great warehouses and canneries will be needed for this product alone. A packing house and wool scouring mill will be necessary to take care of the hundreds of thousands of sheep, cattle and hogs that this country around Ontario will produce and these enterprises will be built here in the near future.

It is no long dream until these things are accomplished. Before the close of the year 1913 we are going to see the railroads making their preparations to operate all of these various lines from one center at Ontario. Once this is done jobbing houses, warehouses and other enterprises will spring up like magic and a few years will see the accomplishment of these things and Ontario a great city with the doubtless setting back and saying "I told you so. I knew it all the time."
