

# We Have Moved

Our great stock of Dry Goods, Shoes, Gent's Furnishings to our New Store. The Grocery Department will be moved about May 1st.

We welcome you to come bring your friends and show them Ontario's greatest store.

Our rest room is ready for your use, it's a nice place to meet your friends.

Our Stock is growing larger in every department and the newest things prevail.

Don't forget the Slogan, "MEET ME AT RADER'S REST ROOM."

### OH, YOU SWEET, SWEET MARIARI!

Mariar had the greatest hen  
To lay, lay, lay!  
She wouldn't lay off laying eggs  
Upon the Sabbath day.

But this hen, too, flew o'er the wall—  
She was an awful fier—  
And when she dug the gardens up  
She raised the neighbor's ire.

And so the women came across  
To lay the law down hot;  
If she didn't kill that hen at once  
They'd do it on the spot.

Mariar heard them with a smile.  
No, never assed them back.  
She took the ax right then and there  
And gave that hen a whack.

Then, kissing all their wrath away,  
She cooed in dulcet tones,  
"Come over, now, tomorrow, dears,  
And help to pick her bones."

Thus threatened war did not occur.  
Mariar beat The Hague.  
So, neighbor, go and do likewise  
If your hen is a plague.

C. M. BARNITZ.

### THE BEAUTIFUL WHITE EMBDEN.

The goose is sure an antique.  
Monuments show that goosey-geesey-gander  
has been following man up  
and down creation for over 4,000  
years.

The Toulouse, coming direct from  
the wild gray, is oldest.

The beautiful White Embden is  
claimed by some to originate from the  
mating of a white wild swan and the  
Gray, while others claim it is an al-  
bino from the Toulouse, just as the  
White Rock comes from the Barred.  
Whatever its history, the Embden is  
superior in many respects to the  
Toulouse, and we advise our readers  
to carefully select breeders to preserve  
the characteristics of this splendid wa-  
ter fowl, which has gained much in

size, beauty, quality and popularity  
since it was brought over to America  
100 years ago.

The gander should be pure white,  
two to five years old, have erect car-  
riage, large head, long neck, bright,  
large blue eyes; stout orange bill, long

Photo by C. M. Barnitz.

### EMBDENS, WHITE AS SNOW.

straight, broad back; wide, round, full  
breast; compact, deep body; strong,  
large, well rounded wings, folding  
smoothly to sides; stout thighs, strong  
shanks, toes and webs of deep orange  
color.

He should appear massive, be not  
overfat nor thin, nor should he have  
developed large abdominal pouch nor  
prominent keel.

The goose should be his copy, but  
more refined; from two to twelve years  
old and not too closely related. Two  
to three geese to the gander is the  
limit.

The Embden affords a fine quality  
of flesh, is a good layer, has no dark  
pin feathers, and its white plumage is  
abundant and brings the highest price.

The goslings are very rapid growers  
and make splendid green geese for  
Thanksgiving and Christmas.

Young gander.....	15	Young goose.....	14

### DON'TS.

Don't proclaim your young birds that  
win at the fairs "phenomenal" and  
"sure winners" at the coming winter  
shows. Those that show precocity oft  
drop to mediocrity.

Don't sneer at the woman who shows  
against you. If the female of the spe-  
cies is more deadly than the male, of  
course the male who sneers at her  
will meet a sad finale.

Don't stoop to little tricks in busi-  
ness. The small man always comes  
out the little end of the horn.

Don't have too many irons in the  
fire. The specialist in a good line has  
a rich vein of gold to mine, but he  
who dabs at that and this is always  
sure success to miss.

Don't put off culling the flock till  
they eat their heads off. To the cu-  
linary cook pot with them.

The world's consumption of petro-  
leum is 1,000,000 barrels per day. The  
United States produced as its share of  
the world's output 220,000,000 barrels  
in 1912, and of this large amount the  
state of California furnished 87,000,000  
barrels.

A California rancher who evidently  
believes in the strenuous life manages  
to work his land twenty-four hours a  
day during the busy season. He oper-  
ates three shifts of men and teams  
eight hours each and provides artificial  
light for those working between sun-  
down and sunup.

Many folks in their relation to the  
need of a comprehensive and sensible  
program of permanent road building  
are altogether too much like the Arkan-  
sas philosopher who when it was rain-  
ing couldn't fix his leaky roof and who  
when it wasn't raining thought the re-  
pair entirely unnecessary.

For clearing up a piece of brush land  
there is nothing that will do the busi-  
ness more effectively or satisfactorily  
than a flock of Angora goats. The  
goats will not only kill practically ev-  
ery shrub in the tract, but they will  
gain enough in weight to more than  
give interest on the money invested in  
them while they are at work.

Good prices that are being received  
for blooded cattle at numerous sales  
seem to be due to the unusually high  
prices that are being paid for beef ani-  
mals and to an increasing interest on  
the part of many stock raisers in the  
raising of pure bred cattle as a means  
of increasing the farm receipts.

If a fellow has the money he can tie  
up in it there would seem to be some  
good money to be made by baling a  
good quantity of this fine bright straw  
that is going begging at a low price.  
If it is dry when baled it will keep  
indefinitely and is bound to fetch a  
higher price in the next two or three  
years.

Skim milk and buttermilk have about  
equal feeding value for pigs. The full  
value of these feeds can not be obtain-  
ed unless fed with grain. The value  
varies with the proportion of skim milk  
given. When from one to three pounds  
for each pound of grain is fed, the milk  
is worth more than when a larger  
amount is given.

It is a tribute to the worth of agri-  
culture as a profession that so many  
men manage to shin along and make a  
living with exceedingly poor and slip-  
shod management. The facts noted  
tend merely to emphasize the truth  
that there is no vocation in which the  
expenditure of a given amount of en-  
ergy and brains will produce larger re-  
sults than in farming.

# Paint Keeps the Home Bright

A LITTLE paint here, a touch of  
enamel there, a brushful of varnish  
yonder—everyone can see a dozen or  
more such opportunities for brightening  
and beautifying the home.

Perhaps it's the outside of the house that  
needs protection from the ravages of the weather;  
perhaps it's a chair, or dresser, the floor or wood-  
work that has become worn and shabby, or perhaps  
it's the family carriage, the farm wagon or the lawn  
swing that has ceased to be a source of pride.

No matter what it is that has become marred and  
unsightly from age and wear, there's an Acme  
Quality paint, enamel, stain or varnish that will  
exactly fit the need. We are agents in this  
vicinity for

## ACME QUALITY PAINTS AND FINISHES

—the most scientifically prepared, the most satis-  
factory in appearance and wear, made in the  
largest paint and varnish plant in the world.  
Simply tell us what you want to do, ask for the  
proper Acme Quality goods for that purpose and  
you are sure to get the best that can be made.

The Acme Quality Painting Guide Book tells what Acme  
Quality Paint, Enamel, Stain, Varnish or Finish to use, how  
much will be required and how it should be put on. It not only  
enables you to tell your painter or deco-  
rator exactly what you want, but makes it easy  
for you to refinish the many surfaces about  
the home that do not require the skill of the  
expert—the jobs that a painter would not  
bother with. Ask us for a copy. It's Free.
