SELLS-FLOTO SHOWS WILL BE IN PAYETTE MAY 27

One of the special features of the many that will be presented by the Sells-Floto circus this season will be the famous Devlin Zouaves, which embraces a troupe of young men who have no superiors or masters in the art of executing remarkable and difficult military maneuvers. There is an object lesson in accuracy, defense and skill. One of the feature acts is that of storming the fort. A huge, high wall is erected presenting a formidable barrier. With lightning like speed these supreme conquerors of military difficulties convert themselves into human pyramids and in rapid rotation scale the wall with arms, ammunition and accoutrements, planting the emblem of freedom on its ramparts.

It can safely be said that there is not a body of men who can approach in the slightest the skill and wonderful exactness of these remarkable people. The Devlin Zouaves will be seen each day in the parade, which this year promises to be one of the best free street spectacles ever given.

It might also be mentioned that the Sells-Floto people still adhere to the cut rate price of admission, which is 25 cents. Those who do not care to visit the performance of the circus can find much entertainment by going to the circus lot in the morning or evening and hearing the concert given by the Berrnigant serenadum, which is the largest musical instrument in the world. The Sells-Floto circus will give two performances in Payette Tuesday, May 27.

BUTTER OFFERED FOR SALE MUST BE PROPERLY LABELED

J. D. Mickle, the Oregon Dairy and Food commissioner, is out with another circular stating that he is going to prosecute anyone offering butter for sale that is not properly labeled showing who made it, where it was made and the weight of the package. This is rather sweeping, but seems to be the only way to stop the sale of short weight packages.

M'WILLIAMS STABLES SHIP HORSES OUT TO MONTANA

There were two car loads of horses and mules shipped from the McWilliams stables a few days ago for the Montana markets. The demand is for heavy animals and they meet with ready sale at good prices. The farmers will not make any mistake if they pay more attention to the raising of large colts. There is not a large boned, heavy draft stallion in this section, which seems strange with such a demand for that class of horses.

DO NOT WANT FRUIT TREES SPRAYED WHILE IN BLOOM

Fruit districts of the state might take a tip from Hood River beekeepers, who have asked that orchardists do not spray their trees during the time the blossoms are fully open. This results in killing large numbers of bees, which are the most valuable helpers orchardists have. Their aid is invaluable in spreading pollen from tree to tree.

The "Schuttler" Costs Less Per Year Than Any Other Wagon Made

The cheapest priced wagon is the one which will save you the most money—and there is far more than the first cost to be taken into consideration with most wagons. But with "The Old Reliable Peter Schuttler" it's different. With it, the first cost is practically the only cost. It's built right and stays right. It saves repair bills; it avoids break-downs; it reduces the after-purchase expense—and it wears longer than any other wagon built. And with all its cost-reducing, time and trouble-saving features, the first cost of the "Peter Schuttler Wagon" is only slightly more than the first cost of the inferior makes.

And every cent of the extra cost goes into extra quality. There's no more profit on a "Peter Schuttler Wagon" than on the so-called other standard makes. The difference in price is due entirely to the difference in material and the difference in the way this material is put together. It is this difference which makes the "Peter Schuttler" by far the cheapest priced of all wagons in the long run.

Nothing but the very highest grade, specially selected hickory and white oak is good enough for the "Peter Schuttler Wagon." And even it does not come up to the Schuttler standard until it is seasoned by natural air-dried process for from three to five years in sheds specially built for the purpose. Great pains are taken by long-experienced wagon makers and skilled blacksmiths in the manufacture of the "Peter Schuttler Wagon." The best of refined iron is used, and it's shrunk on hot, thus charring and preserving the wood and insuring a perfect fit. Every wheel is measured and its tire welded to exact size, then brought to a cherry heat, and shrunk into place by being plunged into cold water, in the same way that the old

The Old Reliable Peter Schuttler Farm Wagon

original Peter Schuttler did it sixty-nine years ago. That is why the tires never come loose on a "Peter Schuttler Wagon." Every piece of wood in the "Schuttler" gear is given a bath in boiled linseed oil, thereby closing the pores and protecting it against moisture. The paint is ground in linseed oil and then spread on smoothly and evenly with a brush—not dipped. It takes three years to get an axle in right condition for a "Peter Schuttler Wagon," and even then it must pass the regular rigid inspection to which every "Schuttler" part is subjected before it can be used. These are only a few of the many reasons why a "Peter Schuttler" is the most economical wagon you can buy. Come in and inspect it. FOR SALE BY
