Every now and then some flower expert declares he has evolved a blue rose. He hasn't. There is no such thing in nature and never can be. A dull, purplish, bluish red rose has been evolved. But it is no more blue than the sky is green. A gardener once evolved what passed for a blue rose until it was learned that he produced it by watering a white rose's roots with indigo. In nature there is never a blue flower, a red flower and a yellow flower of the same species. There are red roses and yellow roses, but no blue roses. There is only one golden grain belt beer, advertisement. Wm. Winslow of Copperfield, Oregon, a brother of Mrs. W. R. KANSAS FARMERS WILL HOLD WHEAT

Topeka, Kan.—Kansas farmers will hold 100,000,000 bushels of wheat this year, or 25,000,000 bushels more than the entire crop of 1913, according to W. H. Mitchell, national vice-president of the Farmers' Society of Equity. Mr. Mitchell is organizing the farmers of Kansas and urging them to hold their immense crop for higher prices. Sixty-cent wheat in Kansas has become the rule and has turned the thoughts of the farmer to the possibility of holding his grain. When the organizers arrive in a community they find little opposition to the idea of holding the grain, Mr. Mitchell said. "I do not believe more than one-fourth of the wheat grown this year will be sold," said Mr. Mitchell. Grain bins of frame and cement construction are being rushed all over the state, and in many places wheat is being piled on the ground by farmers who refuse to accept present prices for it. The Farmers' Society of Equity, is campaigning for dollar wheat, but the Kansas members will sell their grain for less than that figure, it is generally believed. Most of them are preparing to hold for higher prices than the 60-odd cents now offered, however. Banks Help Buy Cows. Grangeville.—In order to encourage and promote the dairying business in this locality, the banks of Grangeville have agreed to finance the farmers in purchasing livestock to improve their herds, and it now only remains for the farmers and dairymen to exhibit a proper spirit of co-operation to put into working shape a plan whereby all who have the welfare of this industry at heart may help to make Idaho county one of the greatest dairying sections in the northwest.

IDAHO POLITICS ARE MIXED

Varying Dry Planks by Three Parties Liable to Cause Defections. Boise.—Party lines in this state will be largely obliterated in the political fight now opening because of the wet and dry or prohibition issue. This is forecasted by political leaders and is generally becoming recognized by voters. The prohibitionists are preparing their master stroke to place Idaho in the dry column by legislative enactment, followed by constitutional amendment. In arranging for the campaign they have been successful in obtaining incorporation of prohibition planks in the republican, democratic and progressive party platforms. The conflict before them is to elect men to the legislature who will carry out the party pledges. The platform of the three parties have brought about this situation. The fact that 23 counties in the state are now dry gives some indication of the strength of the anti-saloon forces. In addition, they hope to gain votes from the ultra-drys, who do not favor local option, but believe that by making the state dry the biennial agitation over the saloon issue can be done away with. By centering their strength behind legislative nominees, who can be counted on to enact prohibition legislation, the drys are confident that, with the practical elimination of party lines, they can win.

Clearwater Survey Deferred.

Lewiston.—The city council has decided that it will be necessary to obtain prices on the land around the head of Porter's island before it will authorize the expenditure of \$500 by the city to perfect surveys for the construction of a dam across the Clearwater river. The project, if carried out, would cost \$500,000.

New Cheese Factory.
