It was found that the original boundaries for the Malheur drainage district were not the best so a new deal was made and a petition drawn up for a district with different boundaries and there seems to be no doubt but what it will go through all right as the majority of the lands were signed up. Practical Economy

Baking powders made from alum or phosphate may be bought for a trifle less than Royal Baking Powder, which is made from cream of tartar, derived from grapes.

Alum powders are not only cheap, but they differ greatly in leavening power.

If a cheap baking powder is used for a fine cake and the cake turns out a failure there is a waste of costly materials worth more than a whole can of the cheap baking powder.

Royal Baking Powder produces the finest food, and its use therefore, results in an actual saving.
