### STRAYED OR STOLEN.

One black 2 year old Percheron stallion. Weight about 1300 pounds. Slight wire cut on front foot. Very small rupture on naval. Gentle. No brand. \$25.00 reward for recovery. N. R. Shaw, Tamarack, Idaho. Adv. 59-53c

period. The plot used was divided into two equal portions and the hogs were pastured alternately for ten days at a time on each part. This allows for more uniform growth and convenience in irrigating. In addition to the pasture, the hogs were given a supplementary ration of two pounds of corn per day per 100 pounds live weight.

"On April 24 five high-grade Duroc-Jersey hogs weighing 750 pounds were placed on the alfalfa plot. On May 24 it was found necessary to remove on hog, as the supply of feed was inadequate. The remaining four hogs were taken off July 14, and on the same date eight pure-bred Duroc-Jersey shoats were placed on the plot. These shoats, having a total initial weight of 302 pounds, remained on the pasture until September 22.

"During the two periods 619 pounds of pork were produced. The corn consumed during the season amounted to 1,945 pounds. Estimating the value of the pork at seven cents per pound gives a total return from the plot of \$43.33. The value of the corn fed, estimated as worth \$1.25 per 100 pounds, was \$24.36. This leaves a net return from the alfalfa crop of \$18.97 for the plot, which is at the rate of \$75.88 per acre, as compared with a net return of \$76.88 from a similar experiment conducted in 1914.

"These results and also those secured in 1913 and 1914 indicate that the possibilities of pasturing alfalfa with hogs should receive careful consideration by the farmers on the Huntley project.

"Four of the pigs used in the alfalfa pasturing experiment were transferred to the corn plot on October 1, 1915. At this time the corn was practically all matured. Twenty-five days were required for the hogs to harvest the corn. During this time the hogs gained 216 pounds, or an average daily gain of 2.16 pounds per hog. The yield of the quarter acre plot was estimated to be 12.14 bushels, or 52.41 bushels per acre. Valuing pork at seven cents per pound, the hogs returned \$15.12 per quarter acre, or \$1.15 per bushel for the corn consumed. In other words, the hogs consumed 3.4 pounds of corn for each pound of gain. In the similar experiment conducted in 1914 hogs consumed 3.55 pounds of corn for each pound of gain."

### RESERVATION INSPECTOR CANTWELL VISITS LAKES

George G. Cantwell, reservation inspector, U. S. department of agriculture biological survey with headquarters at Payallup, Washington, is in the city and has made a tour of inspection of Malheur lake and the bird reserve. Mr. Cantwell is here for the purpose of giving his department first hand information about the bird reserve and the contemplated drainage of the lake that will eventually destroy the bird reserve.

We are pleased to note in our talk with Mr. Cantwell, that he looks at the matter from a broad standpoint and realizes that birds and game reserves must give way to development. —Harney County Tribune.

## WITH PULPIT AND PEW

### BAPTIST.

The fundamental work of the church is to build men into God. The paramount thought in a revival is to make men temples for the indwelling of the spirit of God. The business of the church is to quarry men from the great masses and build them into temples for God. Revival meetings are arranged for this very thing. The church that is not evangelistic is missing the mission the Lord intended for it.

Come to the Baptist church and get warmed up. Topics for next Sunday: 11 a. m. "The Witness Within." 7:30 p. m. "The Well Springs of Salvation." These services will be evangelistic meetings up to the special meetings which is to begin November 5.

A hearty invitation is extended to the public to attend these services. D. E. BAKER, Pastor.

### HOW THE FARMERS HAVE BEEN GIPED BY WILSON'S FRIENDS

The investigation conducted into the trust which controls the binding twine industry of the world is but another indictment against the present administration at Washington. It demonstrates again the inability, or the positive ignorance of the officials combating the enemies of the farmer.

The investigation also explains what has resulted from the recognition of Carranza, and it is a significant fact that the agent of the trust in this country is Norman Lind, son of John Lind, the railroad attorney from Minnesota who was sent by President Wilson to throw Huerta out so Carranza go have have his way. This ought to make the farmer think Wilson and his gang are their friends.

Representative Halvor Steenerson of Minnesota explains the situation thus:

"The binder twine situation is in the control of the Commission del Mercaderes de Honnequin, Reguladores de Yucatan," the representative said. "This is the most iron-clad trust in the world and controls absolutely the world's supply of sisal, out of which binder twine is made. This trust was organized by the military government of Yucatan, who controls it. The organization was approved by Carranza and the trust was financed in the United States with the approval of the state department.

"Norman Lind, whose father, John Lind, was sent as President Wilson's personal representative to Mexico, is its American representative. This trust already has doubled the price of sisal to the state of Minnesota, which means an extra tax of at least 10 cents an acre in Minnesota. This money goes to the military government and Carranza."

### EAGLE KILLED BY POWER LINE.

Trouble somewhere on the electric power line Saturday led Ralph Carpenter, of the electric power office to a point two miles this side of Horseshoe Bend. There he found a big eagle dead on the ground and two wires overhead buried by a short circuit. The supposition is that the eagle flew into the wire during a heavy fog that prevailed that day and caused a contact of two of the wires. The eagle was a big one, measuring six feet nine inches from tip to tip of wings.—Kinnett Index.

Our supply of school books and tablets are larger than ever. Our values this year are really great and particularly in quality. Everhart Drug Co. adv

## Range and Alfalfa

## THE UNIVERSAL INSTRUMENT

Thirty years ago the telephone was a luxury. Today, through personal initiative and private enterprise, it has become a necessity within the reach of everybody. Where once a business had but one telephone with a limited talking range, today that business has service with a range three-quarters of a continent broad, and every branch of every business is linked to every other by an intercommunicating telephone system.

The telephone has earned its responsible place and there are now 3,000,000 Bell telephones in this country, over which 26,000,000 talks daily.

Every Bell Telephone is a Long Distance Station.

Malheur Home Telephone Co.

## Pendleton Normal School Proven Necessity

(Cabled from Portland Oregonian.)

MONMOUTH, Ore., June 26.—The Oregon Normal school opened this week... students enrolled 782, largest on record for state Normal in Oregon... how to care for large student body a problem... being crowded into auditorium with seating capacity of 550. Galleries filled with extra chairs in aisles. More than 150 students seated on platform. New boarding houses completed, additions to rooming houses built and tents used. One hundred girls sleep on upper floor of school.

The official school report gives 150 grade pupils in Monmouth for teacher practice.

Read what those you have elected to handle the affairs of your state and who are thoroughly informed regarding school conditions in Oregon have to say concerning measure 308 on the ballot at the coming election:

By James Withycombe, Governor of Oregon: "Oregon is unfortunately in need of more normal schools and Pendleton is the logical place for a school of this class in Eastern Oregon."

By J. A. Churchill, State Superintendent of Public Instruction: "I trust that the voters of the State will assist in raising the standard of our schools by establishing a State Normal School at Pendleton."

By P. L. Campbell, President of the University of Oregon: "At least one additional Normal School is urgently needed in Oregon."

By W. J. Kerr, President of the Oregon Agricultural College: "Since the people of Pendleton are initiating a measure for the establishment of a Normal School at that place, it will give me pleasure to support this measure."

By J. M. Ackerman, President Oregon Normal School, at Monmouth: "A careful analysis of the situation will convince any one that Oregon needs a Normal school in Eastern Oregon and Pendleton fills all the government requirements."

By the County School Superintendents of Oregon: "Resolved, that it is the sense of the County School Superintendents of the State of Oregon, in convention assembled, that the best interests of the schools of the State demand increased facilities for the training of teachers, and that we, therefore, endorse the initiative measure to establish a Normal School at Pendleton."

By Mrs. Charles H. Gaetner, President of the Oregon Federation of Women's Clubs: "I most heartily endorse the location of said Normal School at Pendleton."

Prof. Robert C. French, Former President of the Normal School Located at Weston: "An immediate establishment of such a school at some central point such as Pendleton would prove a great asset to the State of Oregon."

B. F. Mulkey, Ex-President Southern Oregon Normal School: "I shall support the location of an Eastern Oregon Normal School at Pendleton."

State Board of Regents of Oregon Normal School declares that "the necessity for additional Normal school facilities in Oregon is apparent." Portland Chamber of Commerce endorses measure 308 and says Pendleton most logical location for Normal school in Eastern Oregon.
