### DAIRY HERDS SHOW OWNERS BIG PROFITS

Report of Malheur Cow Testing Association for August and September Prove Interesting.

The reports of the Canyon-Malheur Cow Testing Association for August and September show that the dairymen are getting some fine results. The cheese factory at Nyssa has been paying thirty cents or better for butter fat, and the whey has been hauled home and fed to hogs and calves to make an additional profit.

It is indeed hard to understand why more farmers, who are within reach of a good market, as the Nyssa Cheese Factory or the Farmers' Co-operative Creamery of Payette, do not milk cows. It is a business that is reliable and works so many benefits to the farmers. It makes the farmer independent of the hay buyer and also makes it possible for the farmer to feed his own corn thru the silo. It improves the fertility of the farm and allows for a rotation of crops, such as pasture, alfalfa, corn and grain.

I would like for the person who is

Owner of cow	Name of cow	Br.	Age	Fresh Milk	B. F. B. F.

C. W. DeBoer's herd ranks first with an average of 1221 pounds of milk and 45 pounds of butterfat. P. Tensen's herd second with an average of 935 pounds of milk and 39.3 pounds of butterfat.

C. W. DeBoer has the leading individual cow this month which produced 2121 pounds of milk and 62.9 pounds of butterfat in 27 days.

One cow in W. F. Harper's herd was second with 1497 pounds of milk and 60.9 pounds of butterfat.

contemplating the dairy business to look over the dairy farms around Nyssa and compare them with the other farms. It is the same story in every country. Big crops, and well kept ranches. This year Mr. W. G. Gibson took 248 sewed sacks of onions from one-half acre, which was the result of heavy applications of manure. Other crops on the dairy farms were in like proportion.

During August when many of the herds were dry, four herds, Gibson's Hunt's and DeBoer's of Nyssa, and Harper's of New Plymouth, made better than thirty-two pounds of fat; Mr. Gibson's making an average per cow for the entire herd of 48.7 pounds fat per cow. Figure this at thirty cents per pound and see how much they made. Gibson & Son also had the two best cows in the association, one made 75.2 pounds of fat or \$22.56 and the second 69.2 pounds of fat or \$20.76 for August.

The following is the tester's report for the two months, August and September. The September report shows that Mr. C. W. DeBoer of Nyssa had the best cow and herd, while Pete Tensen also of Nyssa had the second herd for this month.

347 cows on test this month, making an average of 660 pounds of milk and 26.4 pounds of butterfat. Average test 39.9.

W. L. Gibson & Son's herd made the highest butterfat average this month, 48.7 pounds. W. F. Harper, C. C. Hunt and C. W. DeBoer tied for second place with 1.97 pounds of butterfat average.

The two best cows in the association were in the Gibson herd, making

75 pounds and 69 pounds respectively.

R. C. MACKINSON, Tester.

#### EUROPEAN INDUSTRY ACTIVE.

The political campaign is a thing of the past, but the problems of the United States are things of the present and future. In one of his speeches at Shadow Lawn, President Wilson ridiculed the claim that European nations are engaged in manufacturing a great body of products which will be dumped on this country after the war. Within twenty-four hours after that statement was made, the submarine freighter "Deutschland" appeared in New London, Connecticut, with \$10,000,000 worth of goods direct from Germany. When Germany can send us goods under such circumstances as these, what will she not do when the war is over and her ships are free to traverse the ocean without let or hindrance either from foreign countries or from protective tariff laws of the United States?

If the Adamson bill were to be voted upon again with the election past instead of coming, the result would probably be considerably different.

### Speedy and Easy Riding

There's little comfort in most low priced cars. You can't use their speeds. They jostle you—they ride roughly—they don't hold the road.

It has long 42-inch, easy riding, shock absorbing cantilever rear springs. In addition the 75 B Overland is a longer car—104-inch wheelbase. And it has 4-inch tires.

The \$635 Overland is different. It is not only the speediest of low priced cars—

Its smoothness and ease of riding at any speed would do justice to a much larger and heavier car.

But you can use the full speed of its powerful motor when you need it.

Come in and let us demonstrate. That's the best kind of proof.
