THE UNIVERSAL INSTRUMENT

Thirty years ago the telephone was a luxury. Today, through personal initiative and private enterprise, it has become a necessity within the reach of everybody. Where once a business had but one telephone with a limited talking range, today that business has service with a range three-quarters of a continent broad, and every branch of every business is linked to every other by an intercommunicating telephone system.

The telephone has earned its responsible place and there are now 8,000,000 Bell telephones in this country, over which go 25,000,000 talks daily.

Every Bell Telephone is a Long Distance Station.

Ford

The Universal Car

The new Ford cars are up-to-the minute in appearance, with large radiator and enclosed fan, hood with full streamline effect, crown fenders front and rear, black finish with nickel trimmings—a snappy looking car—and with all the dependable, enduring and economical qualities that have made the Ford "The Universal Car." One fact is worth more than a ton of guesses. Ford cars are selling from five to ten over any and all other cars, simply because they give more satisfactory service, last longer and are easier to operate and cost less to maintain—and there's no guessing about the reliability of Ford Service.
