

Shadows of the Past

No one who has once become accustomed to the convenience and comfort of the
G-E ELECTRIC RANGE
would ever be satisfied to cook again with a coal or wood stove.

Just think of it—no carrying of heavy scuttles of coal; no ashes to remove and pile on the floor; no coal gas; no waste heat. There is, instead, absolute cleanliness, total absence of smoke or fumes, perfect heat control and no waste of fuel.

May we show you this efficient range?

Come and See Titan 10-20 Real Kerosene Tractor

HERE is your opportunity to see Titan 10-20, the recent addition to the IHC line-up of tractors. It has already a wonderful record. It couldn't help winning out. For two years it was under test and experiment before appearing on the market, and it has all the popular features. Come and see what they are and why they are. Here are some of them:
Titan 10-20 develops full 20 mechanical H.P. in the belt—10 at the drawbar.
It works on kerosene—common coal oil—a fuel saving of about \$200 an average year's work, over gasoline at present prices.
It has a smooth running twin-cylinder engine, 6 1/2" bore and 8" stroke.
Entire crank case enclosed—no dust or grit can get to engine. Shields over drive wheels help to keep out dirt.
No batteries needed—start and run on magnets.
Automatic oiling—keep the oil tank full and the engine does the rest.
Two forward speeds, 1.83 and 2.50 miles per hour—and one reverse.
Powerful, flexible chain drive to each rear wheel.
Turns in 28-foot circle. Handles like an automobile.
Powerful brakes on both rear wheels.
Weight, 5,225 pounds.
This is the tractor we want to show you. Come and see it at work. Then, if you can find a better—why, buy it. But see the Titan 10-20.

Bethlehem's Bid on Shells for the United States Navy

To the American People:

The Secretary of the Navy has awarded contracts amounting to over \$3,000,000 to a British bidder for 14 and 16-inch projectiles for the Navy because of very much lower prices offered by the English bidders.

We know nothing of the basis upon which the British bids were made, but the public is entitled to know the facts upon which we ourselves bid for this work.

Two years ago we took contracts to make 4,200 14-inch shells at a price of \$1,515,000. Up to now not a single shell has been accepted by the Government, although we have expended, in wages, materials, etc., on these orders \$522,881, and we have not received a SINGLE DOLLAR on these contracts.

In addition, a literal interpretation of the contract might make us liable for penalties amounting to \$676,816.

In the light of our experience, and having no other basis, we bid for 16-inch shells approximately the same rate per pound as that which the Navy Department actually awarded a 14-inch shell contract one year ago.
