

A REAL SHOW COMING TO ONTARIO SOON

Take the Children to See This Neatest and Cleanest of Shows—
In Ontario Wednesday, June 20.

To those that have reached mature years the coming of the circus means simply that they will have several hours of keen enjoyment away from the ordinary run of business. But to the youngsters, circus day is THE day, a red letter day, an occasion long to be remembered. You recall with vivid memory, do you not, the very first circus you ever saw? How you stared round-eyed at those fierce looking animals. And you remember, too, don't you, how you failed to understand why those elephants had tails in front and back and how father laughed when you asked him about it? Then there was the music of the bands, the wonderful acrobatic feats of the gaily dressed performers, the funny antics of the clowns all making an indelible impression on your childish mind and transplanting you to a real wonderland.

Many another child will experience these enjoyable impressions on June 20 when the J. H. ESCHMAN WORLD UNITED SHOWS will exhibit afternoon and night at Ontario. We hope with all our hearts that every youngster in the vicinity has the pleasure of seeing this wonderful attraction, or rather this collection of attractions. There are many educational features with a large enterprising like the above, the foremost of which, in our opinion, is that many a youth has been encouraged to greater achievements along physical lines by noting the results obtained by persistent and continued efforts.

Yes, we hope that all the little folk around here attend the J. H. ESCHMAN WORLD UNITED SHOWS and our sympathies are with the little boy or girl who is compelled to stay at home while their more fortunate associates go to the show and return and relate with childish glee the adventures they have

MARVELOUS HUNTERS.
Natives of Australia Are Wizards in the Art of Tracking.
In endurance and speed the Australian aborigine is not the equal of the American Indian, and his weapons of wood and poorly fashioned stones are effective only at short range, but as a hunter the native Australian is marvellously adjusted to his environment. His success lies in an intimate knowledge of the habits of animals on land, in the ground, in trees and under water, and his wonderfully developed powers of observation.

He decoys pelicans by imitating their cries, catches ducks by diving below them, locates an opossum in a tree by marks on the bark or by the flight of mosquitoes, finds snakes by observing the action of birds and follows a bee to its store of honey.
Any animal which leaves a track, however dim, in sand, on rock or in grass falls an easy prey to the track-follower. Children are taught to make marks and to follow tracks, and to find their way back to camp by the tracks of their own feet.
