Wise Daughter.
Father—If you paid more attention to cooking and less to dress, my dear, you would make a much better wife.
Daughter—Yes, father. But who would marry me?

PRACTICAL HEALTH HINTS.
To Avoid Headaches.
Headaches may be a symptom of indigestion, grippe, typhoid fever, malaria, hysteria, nephritis (inflammation of the kidneys), rheumatism, diabetes, anaemia (impoverish blood), neurasthenia (nerve exhaustion) and neuralgia. There are various kinds of headaches differently localized. A sharp ache, coming in paroxysms and affecting the eyeballs, indicates neuritis; a sharp and continual pain, hysteria; a dull and diffused frontal and temporal ache is due usually to digestive disturbances, to anaemia or to nephritis; pain at the top of the head (vertex) may come from excessive "nervousness" or from bladder trouble, while sharp aching in the occipital or lower back part of the head may mean a beginning of meningitis, adenoids or merely decayed teeth. To avoid headaches keep the blood pure and the circulation active by proper diet and regular exercise in the open air. Keep the nostrils clear of all obstructions tending to interfere with nose breathing. Have any refractive errors of the eyes promptly corrected and see that the teeth are attended to regularly to prevent dental cavities or softening.

Skyrockets Before Gunpowder.
It matters very little in the long run to the small boy when, how or where fireworks were first made and of what they are made now. But the fact remains that the despised heathen Chinese first made them and used them and that civilized communities did not know of them until the fourteenth century. The skyrocket was first invented, toward the close of the ninth century and at that time was used, so it is said, in India and China in war. That was long before the invention of gunpowder.

SOUTH TRYON STREET, CHARLOTTE, N. C.
The "Wall Street" of Charlotte

CHARLOTTE HOME OF CAMP GREENE

Historic Town in Piedmont Section of North Carolina is One of Most Favored Cities of the South—Climate, Water and Surroundings Unequaled—Ideal Location For Cantonment.

Charlotte, the city which is to be the transient home of the Western troops, is a historic community, celebrated for the most part by reason of the fact that it was here that the First Declaration of Independence was executed. Patriots of Mecklenburg, the county of which Charlotte is the seat, gathered on a spot now the central site of the city, marked by the intersection of its two principal streets, and without awaiting the later action in Philadelphia, signed a document in behalf of British independence, which has become historic, on May 20th, 1776. This date is annually celebrated by the State, with Charlotte staging its most monumental pageant. Presidents Roosevelt and Taft, Vice-President Marshall and President Wilson have all been the distinguished guests of honor on the occasions of these celebrations. President Wilson having made the principal address and being the central figure in the celebration on May 20th, 1916.

Charlotte is, moreover, the metropolis of North Carolina. Its population is 50,000 and it is the most favored of all Carolina cities in many activities, notably that of cotton manufacturing. Within a radius of 50 miles of Charlotte are 400 cotton mills with a payroll of \$20,000,000 a year and having over 400,000 employees. Its own principal industry is cotton manufacture and the manufacture of by-products of cotton. It is the main distributing center of the Carolinas being State headquarters for more automobile distributing agencies than any other city in the two States. Its skyscrapers are office buildings (sanctified by representatives of Northern and Eastern firms and corporations whose range of activities is over North and South Carolina, the Southern branches of these institutions being centered here.

The aggregate cost of the cantonment when it shall have been made ready for the troops will be between \$2,000,000 and \$2,500,000. There will be an aggregate of nearly 2,000 buildings of wooden construction, in addition to thousands of tents. The wooden structures are barracks, mess halls, hospitals, officers' headquarters and every other essential of a city for an army numbering 50,000 men.

In addition to this central camp or cantonment center, there will be other locations for specific divisions of this vast array of guardsmen. There will be an aviation field of hundreds of acres; a remount station of equal area, a rifle range, artillery range, this latter having as its objective King's Mountain of revolutionary fame. It is approximately 15 miles distant from the main cantonment.

The aviation squad will number 2,500 airmen with half that number of machines. This will be stationed east of the city.

The improved section of Myers Park, the handsome and fashionable residential suburb of Charlotte, will be utilized for some division of the guardsmen, perhaps for the aviation corps.

There will be 12,000 horses in the artillery division and another site will be requisitioned for the accommodation of these.

And, then, there will be several hundred acres used for maneuver grounds, located six miles east of the city on a stretch of sandy loam that can be easily used during any period of excessive precipitation.

To get the camp for Charlotte there has been no stintedness on the part of the progressive people of Charlotte. Whatever charges had to be met for the use of any and all of the nearly 10,000 acres available, have been borne by the business men of Charlotte who have an appreciation of what it means to have a city of equal size to the present proportions of Charlotte in point of population spring up almost overnight just on the outskirts.

The construction work will have been completed at the present rate of progress by the time the last contingent of the 50,000 or more soldiers who are coming here will arrive. A veritable army of laborers are engaged now clearing up underbrush, burning the green trees that have been felled from historic forests, laying beds for the concrete military roads, building barracks and mess houses, leveling and filling up ditches and otherwise converting the landscape of cotton fields and wooded lands into a city for the habitation of man.

Bevo
A BEVERAGE

Watch!!!

For some years, various and sundry concerns have been making beverages which are grouped under the general description of "near-beer." Then came Bevo—a cereal beverage, not a "near-beer," but offered purely for what it is—a delightful, wholesome and nutritious drink. Bevo met with instant and complete success. A whirlwind success.

Owing to Bevo's popularity, some beverages are now being offered in a way to make the appearance of the package look as much like the Bevo bottle as possible. The intention is obvious. But you don't taste the shape of a bottle—it's the flavor of the contents of the bottle that you must depend upon for enjoyment.

Then beware of impersonators—don't be satisfied to try to identify Bevo by the shape of the bottle alone—

Look!!

There are these certain identification marks that are your protection against imitations. Not just imitations of the product, remember—but those more insinuating imitations which try to deceive you by putting an old failure into a bottle similar to a new success. So look for these unmistakable marks of the genuine Bevo—demand that the bottle be opened in front of you, then—

Look for the Seal
See that it is unbroken covering the Crown Top
Look at the Crown Top and see that it bears the Fox
Be sure the Bottle bears this label

Listen!

Bevo is a pure drink. This means more than that it contains pure ingredients—it means that though you might often well be afraid of possible germs in milk or water, Bevo, being a pasteurized product in sterilized bottles, is absolutely free from bacteria.

Bevo is a nutritive beverage—the fine cereals from which it is made give it this quality.

Bevo is a delightful and refreshing soft drink—unlike any you have ever tasted—indeed a Triumph in Soft Drinks.

You can't get these good qualities in anything but Bevo—Command the genuine.

You will find Bevo at lona, cafeterias, restaurants, groceries, department and drug stores, soda fountains, dining cars, steamships, hotels, soldiers' homes, bars, and other places where refreshing beverages are sold. Your grocer will supply you by the case. Bevo is sold in bottles only—and is bottled exclusively by
