Metal Grain Bins

Corrigated or Smooth

"Armco Iron"

THE UNITED STATES IS SHORT 8,000,000 GRAIN BAGS THIS YEAR. THE SUPPLY OF 24,000,000 HAS BEEN TAKEN.

M. K. SNYDER OF THE WASHINGTON STATE COLLEGE WARNS THE FARMER OF THIS DEFICIENCY.

We have arranged to handle the Metal Grain Bins which will replace the bags and will be cheaper and safer. This metal bin is proof against fire, rain, vermin and animals and can be used for a storehouse when not used for grain.

The factory requires our orders by May 1st to assure delivery, and we ask that you investigate and place your orders at once.

SOME REASONS WHY WHEAT MUST BE SAVED

"A Man Cannot Think, Work or Fight When He is Hungry"—We Must Feed Our Soldiers.

"We have the preservation of the world on our hands. Every single living human being in this republic, from ocean to ocean, should make it his or her special purpose to save food."

These are the words of E. F. Cullen, personal representative of Herbert C. Hoover, in a recent address.

"Men will resist any power but the power of starvation," said Mr. Cullen. "Hunger in the final analysis, is the only force that can weaken a nation and demoralize an army. Food is strength, and without a perpetual supply of strength, the world can stand in danger of tottering, weakening and falling into utter chaos. A man cannot think, work or fight if he is hungry."

"The allies today are practically wholly dependent upon the United States for food. Upon this nation rests the responsibility of preserving the world from Prussianism. This is the task of the people of this nation—to produce and save food enough to keep a steady stream of essential supplies moving towards the front so long as it shall be necessary to wage this war. If at any time we fall in this, we must inevitably go down, with the allies, to defeat. This is no exaggeration, but a serious fact. It is the purpose of the United States Food Administration to bring the realization of this fact home to every American man, woman and child, and to enlist the individual aid of our hundred million people in producing and saving food. The Food Administration is not asking you to eat less; it only urges that you substitute one nutritious food for another equally nutritious food, thus saving the vital staples needed by our armies and the armies and peoples of the allies. We must, during the next three months, save wheat especially. Our surplus has already been shipped abroad, and a hundred million bushels more are needed. When you eat a slice of bread less, omit the crackers with your soup, or otherwise conserve on wheat products, you are contributing towards the hundred million bushels needed over there by our fighting men and the exhausted people of Belgium, France and England who have for more than three years been bearing the brunt of this war, which is our war. Keep this in mind, and bring it before the minds of your thoughtless friends and neighbors."

FOOD ADMINISTRATION FACTS

One ounce less of meat each day for everyone means a saving of 4,400,000 meat animals a year. Save your ounce. The sacrifice is small, but the result for your country is large.

1,185,000 tons of sugar will be saved the first year if each of us uses one ounce less each day. This will keep sugar plentiful and cheap.

The Allies are all in the same boat, a long way from shore and on limited rations—and Uncle Sam is running the relief ship. It's up to us to save the cargo.

Reduction, Production—the 1918 watchwords.

Food will win the war. Save it. Produce it.

If you run your household on three pounds of sugar a month per person, when fall comes the grocer won't have to hang up the sign "No Sugar."

The second helping is getting to be bad form.

There's lots of money to go round, but bacon, beef and wheat can't make the circuit. Save your share.

Waste and want are twin sisters and neither beautiful.

Potatoes for Patriotism.

By eating potatoes instead of wheat the people of the United States can help win the war. We have not enough wheat for the Allies and ourselves. We have an abundance of potatoes. Wheat flour is a concentrated food and therefore good for shipping; potatoes are bulky and are consequently not suited for limited shipping space, nor are the Allies so short of potatoes as of wheat. Next to cereals, potatoes have been in this country the mainstay of starchy food, which supplies energy.

The more potatoes we eat, the less wheat we need. A medium-sized potato, weighing about 3½ ounces, supplies about as much starch as two small slices of wheat bread one-half inch thick. In other respects also, the potato measures up well with wheat bread and even has the advantage over it in supplying certain salts which the body needs to counteract the acidity resulting from the use of such foods as cereals, meat and eggs. By exercising her ingenuity the housewife can prepare potatoes in many different attractive ways, thus increasing their proportion in the family diet and conserving wheat and other staples needed for shipment abroad. An important use of potatoes, also, is in the making of breads, in which mashed potatoes up to fully ten per cent may be used without detracting from its appearance or taste; in fact, many persons hold that potatoes properly mixed in bread, improves both appearance and flavor.

Painless Dentistry by Nerve Blocking

Meet Your Uncle Sam

"He's got a bagfull of the best securities on earth—he stands behind it—you know what that means. He's putting these fighting bonds into the homes of our folks from Maine to California. Why, man, this is the chance of a lifetime—to help this grand old country, and to lay something by for that little house on the hill you have been dreaming about."

"Honest goods? Believe me, there never was such goods."

"What! You were looking everywhere for just this chance? Fine! Open the bag, Uncle! He's one of us. He'll take a dozen."

Meet Your Uncle Sam at any Bank or Bond Booth, and get into the fight—and get in big!
