THE WAR, THE FARM AND THE FARMER

By Herbert Quick
Member Federal Farm Loan Board

The farms of this country could carry the war to a victorious conclusion even if all the rest of the nations should quit. The rest will not quit; but we could win it without them if we had to do it. The farmers of the United States can whip Germany. We can whip them with guns. We can whip them with our products. Every farmer in the United States must remember that the war has a first mortgage on every cent he has. The last spare cent in the pockets of every farmer in America should be devoted to the war.

The Kaiser began foreclosing his mortgage on our farms when he declared ruthless submarine warfare. The war is our answer to his bid of foreclosure.

Our contribution is, first, our sons and brothers for the trenches; second, the last pound of food products which we can grow by mobilizing our scanty labor supply, utilizing the men, women and children and the townspeople about us; and third, money for Liberty Bonds.

This is the crucial year of the war. Our soldiers are at the front, hundreds of thousands of them in the trenches, and a million more ready to go. The whole burden of carrying on our own part in the war, and of aiding our sister nations in arms, rests on the United States Treasury.

If the treasury falls or falters or finds itself unable to respond to every call upon it, the war is lost. Do you realize that?

Your son, and all the nation's sons are relying on the United States Treasury to furnish things with which they may fight.

Their lives are lost if the treasury fails. Our country is lost if the treasury fails.

Germany wins if the treasury fails. Therefore every cent you can rake and scrape together belongs to the treasury, that our soldiers may come back to us alive and victorious. This is literally true. We can whip the Germans with our money; but not with the money in our pockets or bank accounts. It must go into the United States Treasury in subscriptions to Liberty Bonds.

White Gerard was our ambassador in Berlin, the Kaiser said to him one day that he would stand no nonsense from America after the war.

Do you know what that means? It means that the Germans intend to subjugate this country if they come out of this war victorious.

The German imperial government has preached the superiority of Germany to all the rest of the world until the German nation is drunk with megalomania. One of their great writers expressed the prevailing official view in 1903, when he wrote:

"The Teutonic race is called upon to circle the earth with its rule, to exploit the treasures of nature and of human power, and to make the passive races servient elements in its cultural development. * * * Whoever has the characteristics of the Teutonic race is superior. All the dark peoples are mentally inferior, because they belong to the passive races. The cultural value of a nation is measured by the quantity of Teutonism it contains."

Are you one of the darker races? Are you willing to be rated as one of the "servient elements" in Germany's cultural development?

You began to be one of the "servient elements" when peaceful people were slaughtered as they carried your produce to market. Was it because you belonged to a "passive race"?

This war is for the purpose of saying to that insane claim, with the roar of a hundred thousand cannons—"NO!"

Never since the Turks threatened to overwhelm Europe was the world in such danger as now. Germany must be defeated this year. Unless we win, our place in the world is lost, and our history as one of the "servient elements" begins. We must withhold nothing from the support of the war. We must give our sons. We must bring forth food in abundance. We must give into the treasury of the United States every cent we can spare.

This summer the support of the war is up to the farmers; and Uncle Sam has never called upon the farmers to raise!

THE UNIVERSAL INSTRUMENT

Thirty years ago the telephone was a luxury. Today, through personal initiative and private enterprise, it has become a necessity within the reach of everybody. Where once a business had but one telephone with a limited talking range, today that business has service with a range three-quarters of a continent broad, and every branch of every business is linked to every other by an intercommunicating telephone system.

The telephone has earned its responsible place and there are now 8,000,000 Bell telephones in this country, over which go 26,000,000 talks daily.

Every Bell Telephone is a Long Distance Station.
