**RED CROSS NOTES**

The use of the Red Cross emblem has been discontinued on garments sent away from the workrooms. In its stead a small tape on which is printed the name of the chapter is sewed into the garments.

Work is at a standstill in the Red Cross workrooms this week owing to the delay in the shipments of the surgical supplies; also the yarn for the large allotment has not arrived yet. Wednesday noon a small amount of yarn was received from the chapter at Weiser and brought a small relief.

Miss Wilmoth Curry has been secured to teach and supervise the even-class of workers which consists mostly of Honor Guard Girls and Junior Red Cross members.

The 95 comfort kits which were given to the W. C. T. U. to make were finished in record time and were shipped the first of the week. A new allotment of 75 comfort kits has just arrived and will also be given to the organization to make.

**ZEROLENE The Standard Oil for Motor Cars**

The Popular Motor Oil More ZEROLENE is used for automobiles on the Pacific Coast than all other oils combined. Leading motor car distributors praise ZEROLENE, correctly refined from selected California asphalt-base crude, because it maintains its lubricating body at cylinder heat and gives perfect lubrication with less wear and less carbon deposit. Get our lubrication chart showing the correct consistency for your car.

**STANDARD OIL COMPANY (California)**

Engines are either water-cooled or air-cooled. This the air-cooled type, like all the internal combustion engines, requires an oil that holds its full lubricating qualities at cylinder heat, burns clean in the combustion chamber and goes out with exhaust. ZEROLENE fills these requirements perfectly, because it is correctly refined from selected California asphalt-base crude.
