Mike laughed at the Judge

for chewing Gravely.

The Judge came right back at Mike with a friendly chew—just a couple of little squares off his plug of Real Gravely.

Mike found that the chew stayed with him for a long while, and the more he chewed the better it tasted.

"There's the real tobacco satisfaction," says the Judge: "and it costs nothing extra to chew this class of plug."

It goes further—that's why you can get the good taste of this class of tobacco without extra cost.

MUST INCREASE FOOD EXPORTS

America Called on by End of War to Supply Added Millions.

ECONOMY STILL NEEDED.

Over Three Times Pre-War Shipments Required—Situation in Wheat and Fat Proves Government's Policy Sound.

With the guns in Europe silenced, we have now to consider a new world food situation. But there can be no hope that the volume of our exports can be lightened to the slightest degree with the cessation of hostilities. Millions of people liberated from the Prussian yoke are now depending upon us for the food which will keep them from starvation.

With food the United States made it possible for the forces of democracy to hold out to victory. To insure democracy in the world, we must continue to live simply in order that we may supply these liberated nations of Europe with food. Hunger among a people inevitably breeds anarchy. American food must complete the work of making the world safe for democracy.

Last year we sent 11,820,000 tons of food to Europe. For the present year, with only the European Allies to feed, we had originally pledged ourselves to a program that would have increased our exports to 17,500,000 tons. Now, to feed the liberated nations, we will have to export a total of not less than 20,000,000 tons—practically the limit of loading capacity at our ports. Reviewing the world food situation, we find that some foods will be obtainable in quantities sufficient to meet all world needs under a regime of economical consumption. On the other

hand, there will be marked world shortages in some important commodities.

Return to Normal Bread Loaf.

With the enlarged wheat crop which American farmers have grown, and the supplies of Australia, the Argentine and other markets now accessible to shipping, there are bread grains enough to enable the nations to return to their normal wheat loaf, provided we continue to mill flour at a high percentage of extraction and maintain economy in eating and the avoidance of waste.

In fact there will be a heavy shortage—about 2,000,000,000 pounds—in pork products, dairy products and vegetable oils. While there will be a shortage of about three million tons in rich protein feeds for dairy animals, there will be sufficient supplies of other feedstuffs to allow economical consumption.

In the matter of beef, the world's supplies are limited to the capacity of the available refrigerating ships. The supplies of beef in Australia, the Argentine and the United States are sufficient to load these ships. There will be a shortage in the importing countries, but we cannot hope to expand exports materially for the next months in view of the bottle neck in transportation.

We will have a sufficient supply of sugar to allow normal consumption in this country if the other nations retain their present short rations or increase them only slightly. For the countries of Europe, however, to increase their present rations to a material extent will necessitate our sharing a part of our own supplies with them.

Twenty Million Tons of Food.

Of the world total, North America will furnish more than 60 per cent. The United States, including the West Indies, will be called upon to furnish 20,000,000 tons of food of all kinds as compared with our pre-war exports of about 6,000,000 tons.

While we will be able to change our program in many respects, even a casual survey of the world supplies in comparison to world demands shows conclusively that Europe will know famine unless the American people bring their home consumption down to the barest minimum that will maintain health and strength.

There are conditions of famine in Europe that will be beyond our power to remedy. There are 40,000,000 people in North Russia whom there is small chance of reaching with food this winter. Their transportation is demoralized in complete anarchy, and shortly many of their ports will be frozen, even if internal transport could be realized.

To Preserve Civilization.

At this moment Germany has not alone sucked the food and animals from all those masses of people she has dominated and left starving, but she has left behind her a total wreckage of social institutions, and this mass of people is now confronted with absolute anarchy.

If we value our own safety and the social organization of the world, if we value the preservation of civilization itself, we cannot permit growth of this cancer in the world's vitals.

Famine is the mother of anarchy. From the inability of governments to secure food for their people grows revolution and chaos. From an ability to supply their people grows stability of government and the defeat of anarchy. If we put it on no higher plane than our interests in the protection of our institutions, we must bend ourselves to solution of this problem.

be proud to be a food Saver

PROVED SPIRIT OF DEMOCRACY

Voluntary Basis of Food Saving Showed Heart of America Beat True for Freedom.

To the voluntary service and sacrifice of the American people must be attributed the continued health, strength and morale of the Allied armies and the civil populace.

Upon this spirit of service and sacrifice will depend Europe's fate in the months to come. In the past year we have carried out an export program, the magnitude of which is almost beyond comprehension. But with the new demands that have come, with the liberation of nations freed from German oppression, our exports must be almost doubled. Instead of 11,820,000 tons, we must ship twenty million tons of food to Europe in the coming year—as much as can be pushed through our ports.

If the Allies had not been fed by America, it would have been impossible for them to maintain their defense against Germany.

Meeting this world need on a purely voluntary basis, the American people have conclusively proved that democracy is a success and that in time of need it will rise to its own defense.

If there were no other accomplishment to its credit the very fact that it has shown the strength of democracy has in itself more than justified the existence of the Food Administration

SAVE 16,000,000 BUSHELS OF WHEAT THAT FORMERLY WAS LOST IN THRESHING

Farmers, Urged by Food Administration, Provide Seven Extra Leaves of Bread for Every American.

By adopting cleaner threshing methods and by literally combing harvest fields to gather grain formerly wasted, threshermen and farmers of the United States this year saved fully 16,000,000 bushels of wheat, estimated as equivalent to about seven one-pound loaves of bread for every person in the country. This result, accompanied by corresponding savings of barley, oats, rye and other grains, is shown by reports from 33 grain states to the U. S. Food Administration. Other states, although not prepared to furnish definite figures of conservation in the grain fields, report greatly reduced harvest losses.

This rural food saving achievement, accomplished in scarcely six months' time, was in direct response to requests by the Food Administration, which asked farmers and threshermen to reduce harvest losses from about 3 1/2 per cent.—the estimated average in normal times—to the lowest possible minimum. Country grain threshing committees carried into every grain growing community the official recommendations for accomplishing the results desired.

In numerous instances drivers of racks with leaky bottoms were sent from the fields to repair their equipment and frequently had order threshing machines were stopped until the cause of waste was removed. But in proportion to the number of persons engaged in gathering the nation's grain crop, cases of compulsion were comparatively rare. The Food Administration freely attributes the success of the grain threshing campaign to patriotic service by farmers, threshermen and their crews. Incidentally grain growers of the United States are many millions of dollars "in pocket" as a result of the grain saved.

NO ONE SUFFERED HERE.

The marvel of our voluntary food-saving, now that we are "getting results," is that no one ever actually suffered any hardship from it; that we all are better in health and spirit and better satisfied with ourselves because of our friendly self-denial.

Food control in America held the price of breadstuffs steady, prevented vicious speculation and extortion and preserved tranquillity at home.

In no other nation is there so willing a sense of voluntary self-sacrifice as in America—that was shown in the stillness from wheat.

Find more wheat. It came; more pork, it came; save sugar. It was done. So Americans answered the challenge of German starvation.

Good will rules the new world as fear governed the old world. Through sharing food America helps make the whole world kin.

in the eyes of the world.

Less than four months after the United States declared war the United States Food Administrator expressed his determination to meet America's food problem on a basis of voluntary action and returned his confidence in the awakened democracy would prove irresistible.

"Many thinking Americans," said Mr. Hoover, "and the whole world have been watching anxiously the last four months in the fear that democratic America could not organize to meet unwelcome Germany. Germany has been confident that it could be done. Country proof is immediately at our door, and our people have already demonstrated their ability to mobilize, organize, endure and prepare voluntarily and efficiently as many directions and upon the mere word of inspiration aside from the remarkable assemblage of our Army and Air Force."

The history of the Food Administration has clearly shown that the trust of those who put their faith in democracy has not been misplaced.

How Could He Do It?

A certain well-to-do young business man called at a bank the other day and asked for a loan of \$500.00. The banker promptly took his personal note for the amount.

Why could he do this? Simply because as a young man he commenced doing business thru the bank. He had learned early in life that the bank could help him in many ways and the banker learned that this young man was a stickler and could be depended upon. In fact each had learned to stay by the other. Young men, there is a lesson in this for you. Start now doing your business thru a good bank like ours. Stay by us and we will stay by you.
