STOCKMEN TO MEET AT BEND APRIL 22

Deschutes Metropolis to Entertain Cattle and Horse Raisers Association of Oregon Next Week

Secretary S. O. Correll of the Cattle and Horse Raisers' association, has issued the official call for the annual convention of that organization. This year the cattlemen will gather at Bend, the thriving metropolis of the Deschutes country.

According to the call the convention will be called to order at 10 o'clock next Tuesday morning, April 22 and will be in session two days. That it will be two days that Bend will remember is a certainty. Ontario knows for it had the honor of entertaining the convention last year, and is still talking about it.

A number of Ontario cattlemen are planning on making the trip to Bend via autos and this is true, too, of many of the stockmen in the upper country so that Malheur county will be represented and be able to renew its jocular feud with Jay Upton and his Prineville gang.

The following is the tentative program of the convention sent the Argus by Mr. Correll:

- "The Beef Industry, Past, Present, and Future," Geo. C. McMullen, of Kansas City, Missouri.
- "Diseases of Livestock," Dr. W. H. Lytle, of Salem, Oregon.
- "Co-operation With the Forest Reserve," by E. N. Kavanagh, U. S. Assistant District Forester.
- "Feeding Silage to Beef Cattle," by Robt. Withycombe of the Eastern Oregon Experiment Station.
- "The Future of the Livestock Industry," by F. R. Hedrick of Kansas City, Missouri.
- "Wintering Steers," by E. L. Potter, Prof. of American Husbandry of Oregon Agricultural College.
- "Poisonous Plants" by J. L. Peterson of the U. S. National Forest Service.
- "Work of the American National Livestock Association," by T. W. Tomlinson of Denver, Colorado, Secretary of American Livestock Association.
- "The Livestock Industry during the Reconstruction Period," by Senator Walter M. Pierce of LaGrande, Oregon.

Cleveland Tractor with tandem disks working on 20 per cent grade.

Built like an army tank-- that's why the Cleveland is so efficient!

THE ability to travel over almost any soil—that's why the Cleveland always stays at work. That's why it gets so much work done.

And it is small enough to turn around in corners—to get into the farm lots—saves the waste ground that can't be reached by the ordinary tractor.

Yet there is sufficient power and speed to enable it to get a great volume of work done, working at a speed of three and one-half miles per hour.

Easy to operate—economical on fuel—the Cleveland is a machine for any farm. Thousands are now in use—building profits—making farms more productive

Get your Cleveland Tractor Now

The spring work is now under way in most coast districts. Those who ordered their Clevelands during the winter months have been receiving them according to schedule. If you want a CLEVELAND this season, DON'T DELAY—ACT NOW.

Save Time, Save Money, by Getting Machinery in Shape Before the Haying Season

Mr. Rancher, what would you think of a doctor who did not keep drugs on hand in his emergency case, to treat you when you needed help?

You would think of him as an inefficient member of his profession and would go elsewhere for such service.

Your farm machinery equipment is just as important to you as instruments and medicine for the doctor. You cannot do your work without them. And when you need them you need them badly.

We keep parts on hand, so far as possible for us to do so. But it takes time often to get special parts, especially in the middle of the season. Shipments are irregular, labor conditions, strikes and other factors make prompt deliveries impossible some times.

Look Your Machinery Over

Take a day NOW, look over your machinery, determine the new equipment you'll need, examine what you have and determine which needs new parts to do work well when the season is on. Don't delay. As "a stitch in time saves nine," an hour used today in getting your parts may save days or weeks when the hay season is on and the crop is deteriorating instead of being in the stacks.

Let us help you save that time, and that means money by getting your order for parts soon.

We handle the best lines of Farm Machinery. Our equipment comes from the shops of makers whose names guarantee satisfaction.
