

Act Now! Don't Delay!

While the Stock and Sizes are Complete

READ, THINK what this sale means to you, as this is your last chance to buy shoes at wholesale prices and less in many instances. The world war has sent shoe prices sky high. There is no half way doing things at this sale. We are selling the best shoes money can buy, for men, women and children, at prices that defy competition, or any mail order house in the United States, and the person that misses this opportunity to buy shoes for many months to come will regret it in the future. There is no telling what unreasonable prices you will be compelled to pay in the near future for inferior quality. If we had told you one year ago that shoes would advance \$3.00 to \$5.00 a pair you would not have believed it. It is a fact, just the same, and prices are still going higher. So by all means let this be a warning. Figure out your present and future needs and take advantage of this last chance to save. In place of selling this stock to some broker who would move it away and make a big profit on it, we are giving the people here the advantage of the bargains. Remember, this sale will only last a limited time, as this stock must and will be sold. To those who were unable to be waited upon Saturday, we can assure you that we still have sizes and shoes to please you. But it was humanly impossible to care for the immense crowds opening day. Come, bring your friends, and get your share of the bargains.
