Everything Good to Eat

THE REAL REASON WHY
In the building industry there are signs of even higher prices because building materials as a group during the war advanced less than any other group, and because there is an actual shortage of a year or more in production.

While we quote prices in dollars the real unit of values is the day's labor and how much it will buy. Prices quoted in dollars sometimes tend to confuse the issue.

ECONOMY IS THE REAL WATCHWORD

Wastefulness must not be permitted. Buildings must be so planned that no material or labor shall be wasted. Especially must labor be conserved, and this can only be accomplished by the most careful planning of every bit of detail. This careful planning not only conserves our resources, but at the same time gives vastly better returns.

SAYS HOT WATER WASHES POISONS FROM THE LIVER

Everyone should drink hot water with phosphate in it, before breakfast.

To feel as fine as the proverbial fiddle, we must keep the liver washed clean, almost every morning, to prevent its sponge-like pores from clogging with indigestible material, sour bile and poisonous toxins, says a noted physician.

If you get headaches, it's your liver. If you catch cold easily, it's your liver. If you wake up with a bad taste, furred tongue, nasty breath or stomach becomes rancid, it's your liver. Sallow skin, muddy complexion, watery eyes all denote liver unsoundness. Your liver is the most important, also the most abused and neglected organ of the body. Few know its function or how to release the dammed-up body waste, bile and toxins. Most folks resort to violent calomel, which is a dangerous, salivating chemical which can only be used occasionally because it accumulates in the tissues, also attacks the bones.

Every man or woman, sick or well, should drink each morning before breakfast, a glass of hot water with a teaspoonful of limestone phosphate in it, to wash from the liver and bowels the previous day's indigestible material, the poisons, sour bile and toxins; thus cleansing, sweetening and freshening the entire alimentary canal before putting more food into the stomach.

Limestone phosphate does not restrict the diet like calomel, because it can not salivate, for it is harmless and you can eat anything afterwards. It is inexpensive and almost tasteless and any pharmacist will sell you a quarter pound, which is sufficient for a demonstration of how hot water and limestone phosphate cleans, stimulates and freshens the liver, keeping you feeling fit day in and day out.

Chickens need a lot of litter to scratch in. Dry leaves make a cheap litter. A good supply should be gathered and stored for future use.

BLOUSE THE CAPE IN FIRST FALL STYLE

Capes are due for much popularity in the fall and winter and this first new fall style shows. The barrel silhouette with a blouse back is the effect. The material is of blue satin, trimmed in rows of silk fringe.
