

AMERICAN STANDARDS AND WHAT THEY MEAN

American standards of labor and of living have been the wonder of the working classes of the world. These standards have never been set back. Why should anyone expect now that the standards of living for any American family shall be curtailed or be brought to the old miserable conditions.

With the enormous building requirements in the devastated regions and the under-built conditions of this country, neither materials or labor will grow cheaper. The same relative values will accrue in the future as in the past to the HOME BUILDER AND THE HOME OWNER THE FORESIGHTED MAN WILL BUILD NOW

Which Are You Saver or Spender?

As a nation we have not, up to this war, been savers.

Look thru the newspapers or magazines and count the advertisements that invite you to spend money, then look for those that invite you to save money.

We are a nation of spenders. We must change to savers and investors.

CANE MOLASSES is used extensively through out this country and Europe as a sheep and cattle feed. It is equivalent of corn in carbohydrates—fattening qualities—and when combined with ground wheat screenings or alfalfa meal makes the most palatable, succulent feed obtainable at a price less than half that of corn. The cohesiveness of molasses binds the particles of ground screenings or alfalfa meal so that it can be fed on the ground without waste.
