FOR SALE OR TRADE—Block of land near Nazarene college at Nampa, Idaho, for residence property in Ontario. W. G. Emry, Box 174, Nampa, Idaho. 49-51

### DRINK A GLASS OF REAL HOT WATER BEFORE BREAKFAST.

Says we will both look and feel clean, sweet and fresh and avoid illness.

Sanitary science has of late made rapid strides with results that are of untold blessing to humanity. The latest application of its untiring research is the recommendation that it be as necessary to attend to internal sanitation of the human body as it is to the drains of the house.

Those of us who are accustomed to feel dull and heavy when we arise, splitting headache, stuffy from a cold, foul tongue, nasty breath, acid stomach, can, instead, feel as fresh as a daisy by opening the sluices of the system each morning and flushing out the whole of the internal poisonous stagnant matter.

Everyone, whether ailing, sick or well, should, each morning before breakfast, drink a glass of real hot water with a teaspoonful of limestone phosphate in it to wash from the stomach, liver and bowels the previous day's indigestible waste, sour bile and poisonous toxins; thus cleansing, sweetening and purifying the entire alimentary canal before putting more food into the stomach. The action of hot water and limestone phosphate on an empty stomach is wonderfully invigorating. It cleans out all the sour fermentations, gases, waste and acidity and gives one a splendid appetite for breakfast. While you are enjoying your breakfast the phosphated hot water is quietly extracting a large volume of water from the blood and getting ready for a thorough flushing of all the inside organs.

The millions of people who are bothered with constipation, bilious spells, stomach trouble, rheumatic stiffness; others who have sallow skins, blood disorders and sickly complexions are urged to get a quarter pound of limestone phosphate from the drug store. This will cost very little, but is sufficient to make anyone a pronounced crank on the subject of internal sanitation.

#### Constipation.

Most laxatives and cathartics afford only temporary relief and should be used only for that purpose. When you want permanent relief take Chamberlain's Tablets and be careful to observe the directions with each package. These tablets not only move the bowels, but improve the appetite and strengthen the digestion.

### "SAFETY FIRST" NEED MANIFEST IN U. S. A.

Auto Accidents Take First Place in Death Roll and Increase Alarmingly—Unique Punishment for Speeders.

A great wave of alarm, righteous indignation, and preventive activity is sweeping the country as a result of the rapidly increasing numbers of persons killed and maimed in automobile accidents daily, according to reports received at the headquarters of the National Safety Council at Chicago.

The tendency to resort to radical measures in order to curb recklessness and carelessness on the part of both the motorist and the pedestrian is exemplified by recent developments in the following cities:

Chicago, where automobile speeders are sentenced to make slow trips through the Morgue under the guidance of a deputy coroner;

Youngtown, Ohio, where the automobile speeder is sentenced to hold watch beside the body of the person killed by his machine or at the hospital bedside if the accident victim is injured;

New York City, where a "Rogues Gallery" for traffic law offenders is maintained by the police department; (A plan to photograph and fingerprint chauffeurs has been proposed to the Chicago Board of Aldermen).

St. Louis, where a grand jury after being in session for four months submitted a lengthy report two-thirds of which was given over to the recommendation of public safety measures.

During 1917 more than 1800 persons were killed and more than 4600 persons were seriously injured in crossing accidents on the railroads of the United States. The greatest number of these accidents were cases of automobiles being struck at highway crossings and of automobiles running into trains at crossings. It is toward the elimination of such conditions that the activities of the National Safety Council and of the United States Railroad Administration in the present Accident Prevention Drive are directed.

The intensity of the contest between St. Louis, Cleveland, Rochester, Detroit, and a number of other cities for the title "Safest City in America" is revealed by a most unusual report submitted to the Circuit Court at St. Louis a few days ago by a most unusual Grand Jury.

1. That additional traffic and motorcycle officers be employed.

2. That police officers, other than those of the traffic squad, be thoroughly familiar with traffic regulations and that they be required to make reports of all such violations observed.

3. That consideration be given to the working out of a plan of one-way traffic east and west, where there is great congestion.

4. That an ordinance be adopted requiring pedestrians to cross the street at regular street crossings.

5. That action be taken giving newspaper publicity to the existence of various associations promoting safety, and that the public be requested to co-operate with such associations by reporting to them cases of reckless driving and violations of traffic laws, such reports to contain the license number of car, place, time and nature of violation.

6. That some plan be worked out in all schools to impress upon the students the importance of safety. Daily talks by teachers in the class rooms and safety contests between schools are suggested.

7. That publicity be given the safety movement in the Sunday schools, churches, and homes.

8. That necessary action be taken for the enactment of a state law requiring that every employed person driving a motor vehicle pass an examination before a board.

9. That upon the enactment of this law, a board be created in the City of St. Louis to instruct all drivers of motor vehicles how to comply with traffic regulations and how to handle motor vehicles safely. This board will examine drivers to ascertain whether they possess the necessary qualifications, such as moral sight, hearing, and other qualifications. Upon meeting all of the requirements the driver shall receive from this board a certificate, which, upon presentation to the license collector together with a signed statement by the driver that he will use due caution and observe all traffic and safety laws and regulations, will entitle him to a license.

10. That an inspection board be created to inspect at regular intervals all motor vehicles to see whether they are in safe condition.
