

JUNTURA NEWS NOTES

The Second Week

"The first of the NEW YEAR we made a number of good, new resolutions. We so far haven't slipped on any of them but one. We did forget the other day and take a little nip on the old corn-cob pipe, but, By Heck, no livin' man can be absolutely perfect. Our main resolutions, however, we're stickin' to like a houn' pup to a bone. We're usin' nothin' but B-P lumber and by thunder, don't intend to use any other kind."

We find this B-P lumber so slick and nice that we have committed ourself to Martha for more improvements around this place than we will be able to make good on, but we are goin' to do our darndest."

GO TO IT, BILL. THAT'S ALL ANYONE CAN DO!

The Ease of the Chalmers Engine Has a Story

Quality First

WHEN you sit behind the wheel of a present day Chalmers you will long remember the rare ease of its engine.

It responds to the slightest call without effort. At high speed you are conscious of no great activity under the bonnet. But you roll along with a certain comfort of mind that is comparable only when you lag along at slow speed and note no "breaking," no "missing," no jerky action—but a quickness, a silence that is smooth and expressive of high efficiency.

There's a story back of this. Most troubles in a car come from vibration. In a Chalmers there is so little vibration as to be negligible.

Its crank shaft and reciprocating parts are balanced to a fraction of an ounce, both static and in motion.

More than this, Hot Spot vaporizes the raw gasoline into a "fog," and Ram's-horn supplies each cylinder with an even "charge."

This provides double insurance against vibration, and generates an ease of action not often found in a motor car.

Once you experience this you, too, will say Chalmers is one of the few great cars of the world.
