LET US HAVE PEACE.

There is too much unrest in this country. Conditions are entirely too unsettled.

There is bickering, backbiting, jabbing and confusion everywhere.

Labor and capital are continually at each other's throats, probably more so than they have ever been before.

Every strike, every cessation of activities, sends the price of living higher.

If one group of men demands increased wages and wins out in the contest, that increase is paid for by an advance in the cost of the product which they produce.

This causes an increase in the cost of living and other groups demand increased compensation in order to meet it.

And so it goes all down the line—always a boost somewhere.

No one is satisfied, practically everyone is more or less disgruntled, and nowhere does a remedy or a stabilizing influence appear to be in evidence.

To bring order out of the present chaos requires the mind of a Solomon—and Solomon is still to be found.

It would seem that one of three things will eventually happen. Prices will go back to pre-war days, a standard of prices for all trades or professions will be fixed, or a great cataclysm will overtake the country and do its own leveling.

The first is difficult to conceive, the second appears impossible of attainment, and the latter is an alternative to be dreaded and shunned.

Two facts stand out as clear as day. The man who is making the money will not relinquish his advantage, and the man who is not making it is determined to have it.

And with these two powerful forces constantly battling each other it is difficult to conceive from what source industrial peace will come.

But we want peace—industrial, political and every other kind of peace.

We are weary of sitting on the lid of a volcano that is continually at the point of eruption.

BIG BUSINESS AND SOLDIERS.

Big Business, it seems, is opposed to the granting of a bonus to our ex-soldiers—the men who made it possible for Big Business to remain Big Business and to become even bigger.

But not all of our Big Business men are opposed to the bonus. A few appear to retain a spark of gratitude in their composition.

Big business cleaned up mountains of profits in fat war contracts while our soldiers sacrificed their comfortable salaries in order to do the fighting.

To put it clearly on a financial basis—to be perfectly and illuminatingly blunt—the soldier went to war and lost money because he went. The Big Business man stayed at home and made money—much money.

The soldier is financially the loser from the war. Big Business is the gainer—tremendously the gainer.

Yet Big Business is opposed to a simple act of justice toward the men who risked their all for their country—while Big Business risked nothing and became bigger.

But if the soldiers' bonus is defeated through the secret influence of Big Business, there still remains one possible means of justice. When the next war breaks out let the government draft the men in control of Big Business into the army and send them away to do the fighting, while others remain at home and get rich.

A man who is physically capable of conducting Big Business today would make an ideal buck private. His qualifications could be utilized to excellent advantage in the trenches.

His perseverance and tenacity might even win him a leather medal.

And we are sure we would not oppose granting him a small bonus on his return.

SALVATION ARMY PLANS BOYS AND GIRLS INDUSTRIAL AND AGRICULTURAL SCHOOL

View of Bishop Scott school and Salvation Army boys being taught orchard work at Lytton school.

One of the big phases of the work the Salvation Army is doing in Oregon to prevent the ills of wrong teaching and poverty and to strike at the root of the despair and grief found in the cities, is the training and care of dependent boys and girls. One of the items of the budget to be raised for the Salvation Army work in Oregon provides for the purchase of the Bishop Scott school at North Yamhill as an industrial and agricultural school where neglected kiddies will be educated and made efficient workers so that when they go out into the world they will be an asset to society and not a charge upon the communities of which they will be members. The 1000 acre farm has a walnut grove and other orchards, and, under proper care of agricultural experts who will teach the boys, its productivity will go far toward making the school self supporting. The school is in no sense to be a penal or reformatory institution but on the other hand it is intended to provide sound vocational education for youngsters who, without it, are on the road to bad citizenship.
