ARE you one of those who believe that no phonograph can match the voice of the living human? An astounding discovery awaits you--like the hundreds who attended the Marie Morrissey recital

Thomas A. Edison gave his famous Tone-Test Friday, May 14th, in the Dreamland Theatre. He had Miss Morrissey sing in direct comparison with the RE-CREATION of her voice by the New Edison.

Music lovers were completely baffled. Their ears were un-

able to distinguish the RE-CREATED voice from the living. You have never heard any phonograph that approaches the New Edison. It RE-CREATES not only the musical notes, but every elusive quality of tone and color which identify the original artist.

The NEW EDISON

"The Phonograph With A Soul"

Come in and hear the identical instrument which was used Friday, May 14th. Make the great discovery for yourself.

*The instrument used in Friday May Fourteenth's Tone-Test is the regular model which sells for \$295 (in Canada, \$431). It is an exact duplicate of the Laboratory Model which Mr. Edison perfected after spending Three Million Dollars in experiments.
