The B. P. Round Roof Solves the Barn Problem

Perhaps you need a new barn to properly protect your stock and crops. That means a building problem that we can help you solve in the best way. The barn shown above has been designed with great care. The practical needs of the farmer have been kept in mind as well as the necessity for economy. The result is a barn that is easy to build, is strong and substantial and provides large unobstructed storage space for hay. Heavy beams and braces have been done away with. The mow space is large and open and the Round Roof construction gives you more room for the same amount of side wall and floor space.

The Best Size for You

We are prepared to provide you with plans and specifications to build a Round Roof barn of any size you may need. The cost of construction is more reasonable than you imagine. Come in and talk it over—we're always glad to see you.
