## The Difference Between Credit and Capital

Credit is purchasing power—you can buy with it, but not make things with it. Credit is intangible, while capital is tangible, as lands, buildings, machinery, materials.

We are at the service of our customers in meeting their legitimate requirements.

## Look at the roads for twenty miles around on a Sunday

**T**HERE isn't any "country" any more. The automobile has brought the most remote settlement almost as close to the center of things as the next county was in the old days.

II

To hear some tire dealers talk you might think that nobody knew anything about tires except the fellow from Broadway.

That's not the basis we go on.

We give every man credit for knowing *what he is spending his money on*, whether he drives up here in his small car from ten miles out in the country or is passing through from the capital in his limousine.

III

That's one thing we like about U. S. Tires.

They make no distinction between the *small car owner* and the owner of the *biggest car in the country*.

It's all the same to them. So long as a man owns an automobile—large or small—he's entitled to the *very best tire* they can give him.

Quality has always been the *outstanding feature* of U. S. Tires. There's no *limit* on the U. S. guarantee. All U. S. Tires are guaranteed *for the life of the tire*.

IV

We have given a lot of thought to this tire proposition. There is some advantage in being the representatives of the oldest and largest rubber concern in the world.

Drop in the next time you're down this way and let us tell you some interesting facts about tires.

Select your tires according to the roads they have to travel:

In sandy or hilly country, wherever the going is apt to be heavy—The U. S. Nobby.

For ordinary country roads—The U. S. Chain or Usco.

For front wheels—The U. S. Plain.

For best results—everywhere—U. S. Royal Cord.
