### PREDATORY ANIMAL CAMPAIGN

Mr. Stanley G. Jewett, Federal Predatory Animal Inspector, has issued his report covering operations of his corps of hunters in Idaho, Oregon and Washington, during the year ending June 30, 1920. The 1919 legislature of this state appropriated \$17,000.00 for the destruction of predatory animals, with the understanding that the Federal Government would match the state appropriation by expending at least an equal amount in the work. Mr. Jewett has had supervision of the campaign in which the Federal Government and the state co-operate.

This report shows that, during the year, the hunters killed in the State of Washington, 9 bears, 70 bob-cats, 1,962 coyotes, 2 mountain lions, 1 lynx, 1 wild dog—a total of 1,145 predatory animals. In addition they killed 65 fur-bearing animals, making a total of 1,210 animals killed.

The fur bearer consisted of 41 badgers, 2 house cats, 2 raccoons, 16 skunks, 2 weasels and 2 otter.

This service has cost the State of Washington \$6,691.52.

During this same period, Oregon paid \$3,655.75 for similar services and the Federal Government expended in the two states of Oregon and Washington, \$44,918.67.

The skins taken from the animals when killed by hunters on the state payroll are sold and the proceeds

come to the state. The receipts during the period covered by the report, from the sale of skins amount to \$2,750.40. The net expense to the state was therefore \$3,941.12.

It is estimated that the predatory animals killed in the northwest during this one year will mean a saving of \$200,000.00 to the livestock interests of the district. Mr. Jewett has received a large number of letters from stockmen all over the district, telling of the direct benefit the hunters have been to them; and, the wool growers organizations will urge the next legislature to appropriate even more than did the last one, to make certain that the work of exterminating the predatory animals is continued.

The Commissioner of Agriculture appreciates the value of the services of Mr. Jewett and his capable corps of hunters, as they have been at work in our state during the last three years, and he will recommend that an ample appropriation be made by the 1921 legislature to be used in co-operation with the Federal Government in the further effort to exterminate the predatory animals in Washington.

### CANVASS OF FARMS SHOWS NEED FOR STOCK SELECTION

Average taken from the accounts of 150 Maryland farms by the Office of Farm Management of the United States Department of Agriculture show how great is the necessity of properly selecting and caring for the farm live stock, and how important is its relation to the income. Farms where this feature was neglected earned only \$76 a year from the live stock. Where the conditions were a little more favorable, but not yet "good" conditions the returns averaged \$737 to each farm.

The same tests in Pennsylvania gave the three averages thus: "Poor" \$413; "medium," \$912; and "good," \$1,215.

Farms in Wisconsin showing poor returns were actually operating at a loss, when medium care would have brought \$599 and good care \$740. Also, in Iowa, the "poor" returns showed an average loss of \$70 to each farm, while the "good" farms paid their owners \$1,333 a year for the care given the live-stock factor.
