VEGETABLES

Our vegetables are fresh daily, and are sold at very low prices.

NOT SPECIAL PRICES

Now folks these are not SPECIAL PRICES but are our regular prices every day until conditions make possible further reductions.

One reason why we can, and do sell, for less than some of our competitors and still make a profit, is because we own our own business and pay no interest. A second reason is: We are not burdened with a lot of high priced labor, as all three members of this firm are practical workers and devote all their efforts to the comforts and satisfaction of our customers.

We pay the highest market price in cash for eggs, butter and poultry of all kinds.

We appreciate our present customers and solicit new ones.

GROCERIES

Our grocery line is most complete, all of the more popular brands can be found at our store. Space in this issue will not permit a detailed price list but we assure you that our prices are RIGHT.

Don't Blame Your Eyes---

Look to the Proper Illumination of Your Home

When you have to frequently stop reading at night and rest your eyes, it may not indicate the need for glasses. Very likely it is the kind of illumination under which you force your eyes to work.

Correct Illumination is the Quality of Light---

Not the Quantity

The most perfect light is the shady side of a tree on a sunny afternoon. You can come close to that in your home by using the right number and kind of electric lamp globes.

What is right depends on the size of the room, the purpose for which you use it, the color of the walls, the height of the ceiling and the voltage of the current which supplies your house. Every socket should be filled, NOW, with a lamp that will give the right kind of illumination.

Come to us—Tell us about your rooms, the color of the walls, and so forth—our lighting experts will prescribe the lamps which will provide you with the best, most economical, most restful illumination. See us today—prepare for long winter evenings.

FARM REMINDERS

Management of fattening steers to produce good gains requires that one handle the cattle gently, make feed yard conditions comfortable, use good quality of feed stuff, feed nothing but good thrifty individuals, Animal Husbandry, O. A. C.

Ensilage should not be feed for at least two weeks after being put in the silo. By this time all the fermentation will have taken place and there will be a uniform feed throughout the silo. Two inches should be taken off the entire surface every day to keep the silage from spoiling, Dairy, O. A. C.

Feed regularly and liberally and keep the hens busy if you want a satisfactory result from your hens.—Poultry, O. A. C.

Spoiled silage should be thrown away where it will not be eaten, as it is harmful not only to dairy cows but to every other kind of stock.—Dairy, O. A. C.

CORN FOR SALE—\$2.10 per 100 lbs., delivered in town. See the Knollwood Dairy man. —49-50.
