MORROW FARMERS USE GOOD TILLAGE

Many Morrow county farmers have been changing their tillage methods in the last two or three years, reports the Farm Bureau news section of the Hoppner Gazette-Times. The tendency is toward earlier plowing for summer fallow, clean cultivation, and timely planting. More good summer fallow cropping was done last fall than ever before, and correspondingly better yields are looked for next summer. Records kept by the Moro branch experiment station for almost a decade showed the advantage of improved tillage. Progressive farmers and extension agents have introduced the improved practices on many farms.
