### What's a Farmer?

A farmer is:—  
A capitalist who labors.

A patriot who is asked to produce at a loss.

A man who works eight hours a day twice a day.

A man who has every element of nature to combat every day in the year.

A man who is a biologist, an economist and a lot more lists.

Who gives more and asks less than any other human being.

Who takes unto himself for his own sustenance and that of his family, those of his products that other people will not utilize.

Who is caricatured on the stage and in the daily papers, but who can come nearer taking hold of any business and making it go than any other American alive and in captivity.

That's what a farmer is.
