ANNUAL MEETING FARMERS' CO-OPERATIVE ASSOCIATION

(Continued From First Page)

dairy products and he was not so much interested in the commercial side of dairy foods but of the humanitarian. He presented facts and figures, undisputed, in a most intelligent and interesting way. There are 6,300,000 school children in the United States below normal in growth and physical condition due to the lack of improper nourishment. In Portland 25% are below normal, and in Pendleton 72% and upon investigation it is found that the children are not receiving the proper food to sustain them to a normal growth. He told us that in an experiment in Seattle of 20,000 one-half pints of milk to the school children each day for one month they were able to reduce the number of the children from 25% below normal to 20% below normal. He said that value of food in one pound of butter was equal to 41 eggs, that an experiment in the state penitentiary of Washington during a three month period by feeding the prisoners all the milk they could consume they were able to reduce the sick in the prison hospitals from 25% to 8%. He emphasized the need for money to advertise the dairy products and called attention to the amount being expended in the various newspapers and magazines for products to take the place of milk and butter; that with one-eighth of one percent of a pound of butter, organized propaganda could combat this enormous body of milk and butter products but what was worth more than that would be benefiting humanity to a very large extent by giving to it the things needed to build the body and make it better able to cope with their fellow men. He said that he was not so much concerned about the sale of 100,000 pounds of butter as he was concerned about how many 100,000 people ate butter. Really there were so many wholesome truths told in such an interesting way that those who missed the address were the losers.

A. J. Plock, Manager of the Boise Co-Operative Company and Mr. Cornack, Field Deputy for Idaho, were present at the meeting.

Following are some of the more important receipts and expenditures of the Co-Operative Farmers' Creamery Company for the year 1920:

Send your blankets to us—we'll have them back in no time at all, with all their first fluffiness, sweet, clean and fragrantly fresh—the cosiest of coverings for frosty winter nights. Telephone.
