

LOCAL PERSONALS

Mrs. H. A. Chapman is visiting relatives and friends in Boise.
 The third and fourth grades of the east side school, Miss Beryl Stith's room, gave a unique program Friday afternoon combining Lincoln birthday exercises with an Arabian program in connection with their study of Arabia. The children were dressed in Arabian costumes and were seated on the floor. They had as their guests their parents. Refreshments were served in Arabian style.
 Judge Dalton Biggs went to Baker Monday where he will hold court for Judge Anderson who is presiding in Malheur river water cases at Vale.
 Fred Rice, who has been at Wallowa the past month was visiting with his family in Ontario the first of the week. Mr. Rice returned to Enterprise Tuesday where he has purchased a barber shop and taken charge of the same.
 "Aunt Betty" Goodman who is 88 years old, was seriously injured by a fall Sunday and is confined to her bed.

Glen Oliver has been appointed postmaster at Alderson, Oregon.
 Mrs. W. W. Letson returned Sunday from San Francisco and other coast cities where she has spent the past month.
 Mrs. S. B. Stacey who has been visiting her son and daughter Mr. and Mrs. J. R. Rasmussen left today for her home in Montpelier.
 Mrs. H. T. Smith of Payette visited Mrs. Kitty Walker the first of the week.
 Mrs. J. R. Rasmussen returned Tuesday from a short trip to Pocatello and Montpelier.
 Mr. and Mrs. Homer Settle of Payette spent last week end with Mr. and Mrs. Herbert Paul.
 Willis Walker and Richard Stockton of New Plymouth visited this week with Mrs. Kitty Walker.
 Dave Logan is down from Brogan. Baker Ball has just returned from a trip to Baker.
 Misses Nellie and Mary Morris who have been with Mrs. Hawkins' Millinery of Welser, are in Ontario making preparations to open a millinery store in the building formerly occupied by the Palace of Sweets.

HIGH SCHOOL NEWS DEPARTMENT

ATHLETICS, AGRICULTURE, BAND, STUDENT BODY ACTIVITIES.

VOCATIONAL NEWS

The students of the Department of Vocational Agriculture attended the lectures of the Farmers' week.
 On Friday of last week the Vocational Agriculture students attended the Poultry show. Breed characteristics were studied and the reasons for placing were determined. There are three students in the Department conducting poultry projects.
 Dr. A. G. Moore gave a very instructive talk to the class on "Common Disease of Livestock." From time to time the students hear talks by men who are specialists in their field thereby gaining some facts not brought out in general discussions.
 The shop work for this week in the Department of Vocational Agriculture was the building of a modern home poultry yard for Supt. J. M. McDonald. The open front colony house, trap nests, scratching pen and run were constructed. The class also advised Mr. McDonald concerning the breed of chickens to purchase and will also advise him about the feeding.

Rye Project Started

Russel Beers, a student in the Department of Vocational Agriculture is conducting for a project 5 acres of rye. Seed selection, seed treatment, preparation of seed bed, planting, irrigating, and harvesting are points of value which he is considering. Besides the actual production of the crop he is keeping accurate records of all the work and other expense he is out in the project. He allows himself 25 cents an hour for his work and pays other help according to the average field prices. Horse labor and machine labor are also evaluated. After allowing interest on investment and other expenses as above mentioned, together with the cost of the seed and the solution for treatment, he will subtract that from the total income and determine the profit or loss per acre. With careful reading of current Farm papers and bulletins and an application of these principles there should be no loss column.
 This is only a typical project as conducted by the various students of the Department of Smith-Hughes Agriculture. The students are allowed to take any type of project so long as it is of material value, this to be determined by the Director of the Department. That allows them to take up work in which they are interested. A great amount of interest is being shown by the students in their project work.
 The last order of Apparatus for the Vocational Agricultural Department is here. The equipment con-

sists of a full library of reference books, current Farm papers, a complete file of bulletins, illustrative material, samples of food stuffs, fertilizers, common stock patent remedies, milk testing outfit, livestock instrument case and a number of other material. The Laboratory is complete for a close study of Agriculture. The regular manual-training shop is used for shop work.
 The High School band is practicing regularly and soon will have a new program ready for presentation. It is the desire of the band to hold several outdoor concerts this spring. As soon as the drill grounds dry up the R. O. T. C. together with the band will give some dress parades, guard mounts and other formal ceremonies.
 The High School orchestra will furnish several numbers on the program of the Literary Club this week. The orchestra now is working on the music for the senior play which is to be held sometime early in March.

Wireless Club

A Wireless Club has been formed in the high school and there are quite a number of students interested. At present they are constructing sending and receiving sets of their own which completed will be used to send messages to each other. The sets are all of the short wave length.

A detailed study of the principles of electricity is the program of the physics course for the next two months. Field trips to study the various practical uses will be made. The work will include a study of radio electricity. The work will be made as practical as possible. The study of heat has just been finished and after the study of electricity, light and sound will be taken up in the order mentioned. Laws and general phenomena are proven by laboratory experiments performed by the students themselves.

Debates Planned

A club has been formed by the students of the General Science Class. Each Friday morning debates and articles are presented by the different members of the club. Last Friday the class debated on the effects of the use of coffee. The side upholding the harmful effects won. Reba Rood is President, Earl Seow, vice-pres., and John Tattersson Secretary treasurer.

The seniors are busily engaged in their annual play practice. Miss Conway is the coach. James Purcell is business manager. The play will be held at the Majestic at a date not yet set.

THE OSBORN MILLINERY

Has a fascinating display of **SPRING HATS**

that have been designed for immediate and later wear. They combine a variety of pleasing effects in all new materials.

SOME are all straw, in semi-tailored effects; some Flowers and Silk combinations and others in Cellophane and Satin models; in turban and off-the-face styles, that are youthful and pleasing.

All are becoming, yet marked at such reasonable prices that one cannot help but select from this collection.
