"NOW-A-DAYS"
says the Good Judge

A man can get a heap more satisfaction from a small chew of this class of tobacco, than he ever could get from a big chew of the old kind.

He finds it costs less, too. The good tobacco taste lasts so much longer he doesn't need to have a fresh chew nearly as often.

Any man who uses the Real Tobacco Chew will tell you that.

Put it in two styles

W-B CUT is a long fine-cut tobacco
RIGHT CUT is a short-cut tobacco

ATTENTION DOG OWNERS
The license charge for dogs owned and kept within the City of Ontario is as follows: Male Dogs \$3.00, Female Dogs \$5.00 per annum, which is now due and payable at the office of the City Recorder.

On all licenses voluntarily paid by dog owners before April 1st, 1921 the City will pay from its license tax the County license as proscribed by law. After April 1st City and County licenses will be collected in full separately by the County and City authorities.

This is an opportunity to secure both licenses for the cost of one but is not good after April 1st, 1921. Dated March 1st, 1921.

CLAY M. STEARNS,
City Recorder

Corn fodder silage is made on the same general principles as silage from mixed hays. The cut materials are given plenty of water and well tramped to exclude the air.— Dairy, O. A. C.

Completion of a new 2000-acre drainage project in the Beaver district, south of Crabtree Lin county, is now assured. More than 75 per cent of the farmers interested signed the petition for this project, and the secretary of the state drainage association, W. L. Powers of the college soils department, has been authorized to draw the petition for forming the district.—Soils, O. A. C.

Where will you spend eternity? You must answer. God gave you the power of choice. Accept Christ and be saved; reject Christ and be lost; choose you this day whom you will serve.

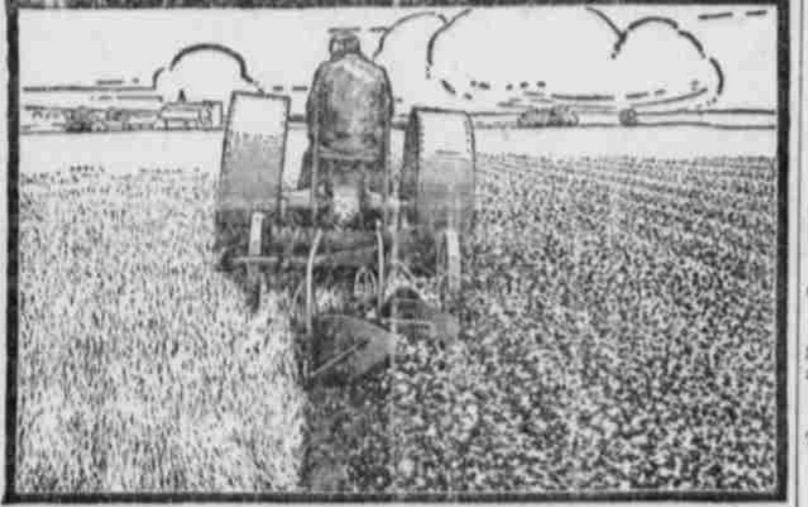

The Savings Club

Back of every branch of our complex and highly developed American industry stands the Savings Book. It has been the accumulated saving of millions of our people that has made our great development possible.

Practically every prominent figure in American finances and industry states, emphatically, that his success has been the result of a determination, at the beginning of his career, to learn to save; and through that determination was accumulated his first capital—often a small amount.

John Deere Built It For The Fordson

We can furnish you with the plow that John Deere built especially for the Fordson Tractor.

It is made of New Process John Deere steel.

That's why it is extra light and strong.

It's the lightest tractor plow you ever saw—weighs less than the average horse-drawn sulky.

It is tremendously strong—beams are guaranteed not to bend or break—all frame connections are hot-riveted—no loose joints—no give anywhere—let the plow you can depend on to stand the strains of twisting Fordson power under all plowing conditions.

Because of light weight and clean scoring qualities, it pulls extremely light. It's a real fuel saver. See it at work once, and you will appreciate how light it pulls.

Its correct line of draft, when hitched to the Fordson assures ideal penetration.

Its genuine John Deere bottoms scour, wear well and make good seed beds.

Its quick detachable shares are strong and close fitting. Loosen one nut to remove a share; tighten the same nut and the shares are tight.

Its simple, strong power lift works perfectly. Lifting mechanism moves only when the plow is being raised or lowered—no useless wear.

If you are planning to buy a Fordson be sure to see this plow. Ask us to show you the John Deere No. 40—the plow that fits the Fordson.
