

## Built Better—Lasts Longer— Costs Less To Operate

It's real economy in the long run to buy a John Deere Grain Binder. Its stronger construction, the proper application of better materials, and its improvements to insure most effective operation under all conditions are apparent the minute you see it.

### JOHN DEERE GRAIN BINDER

Take the main frame for example. Its strong, wide steel bars are widely overlapped and hot-riveted together. The main bearings are self-aligning—there's no twisting of the frame or binding in the bearings.

The wheels are extra high and have wide traction-giving tires. They furnish ample support for the machine and extra traction in wet fields.

The John Deere makes better bundles. Its three packers instead of two insure this. This binder handles extremely short or heavy tangled grain better than others with less clogging and less missed bundles.

Its bundle carrier is the easiest to operate we have ever seen—no particular effort to dump or return to position—it can be adjusted as wear develops to keep it in easy-working order.

The Quick Turn Truck is another feature you will like. It keeps the binder running straight, permits of square turns, takes off side draft from the horses, and because its axle is flexibly mounted, the wheels hold to the ground.

There is no other binder that will give you the years of satisfactory service that you can get with the John Deere—it's real economy to buy this better machine.

Be sure to come in and see it before you buy.
