OREGON SLOPE RANCHERS WOULD LIKE OWYHEE WATER

Adopts Resolution Declaring Their Desire to Secure Gravity Water for Fertile Lands of Valley.

At a well attended meeting of the members of the Oregon Slope, Malheur County Oregon, Farm Bureau, Monday evening, the following resolution was adopted by the unanimous vote of those present.

Whereas: a survey has recently been made of the proposed Owyhee reclamation project covering a large tract of land in Malheur County, Oregon, and the matter of construction thereof is to be placed before the proper authorities in Washington, at an early date.

Therefore be it resolved, That, believing the project to be meritorious, we ask and urge that it have early and favorable consideration, and pledge our cooperation in carrying it out.

This project when completed will place under cultivation and production a large area of very fertile land, now producing nothing. The members of this Bureau are particularly interested in this work for the reason that land owned by them is now under a fine state of cultivation, watered by means of pumps operated by electric power not owned by us, the power being purchased from a power company. This power charge upon the land is high and constitutes a very serious addition to the cost of operation of the irrigation system, and further there are claims now pending on the part of the power Company asking for still higher rates, and we are therefore in fear of still higher rates for power.

The bringing of water upon these lands by a gravity system will be of great advantage.

This land now being under cultivation and having means of distribution will be ready and able to respond at once to calls for cost of construction and maintenance.

We therefore urge with all the emphasis at our command the early undertaking of this work.

Harry K. Lattig, Secretary
 Lee Brown, President.

Sale Price \$3.98

All Tennis Shoes Reduced in Price

Built Better—Lasts Longer—
Costs Less To Operate

It's real economy in the long run to buy a John Deere Grain Binder. Its stronger construction, the proper application of better materials, and its improvements to insure most effective operation under all conditions are apparent the minute you see it.

JOHN DEERE
GRAIN BINDER

Take the main frame for example. Its strong, wide steel bars are widely overlapped and hot-riveted together. The main bearings are self-aligning—there's no twisting of the frame or binding in the bearings.

The wheels are extra high and have wide traction-giving tires. They furnish ample support for the machine and extra traction in wet fields.

The John Deere makes better bundles. Its three packers instead of two insure this. This binder handles extremely short or heavy tangled grain better, than others with less clogging and less missed bundles.

Its bundle carrier is the easiest to operate we have ever seen—no particular effort to dump or return to position—it can be adjusted as wear develops to keep it in easy-working order.

The Quick Turn Truck is another feature you will like. It keeps the binder running straight, permits of square turns, takes off side draft from the horses, and because its axle is flexibly mounted, the wheels hold to the ground.

There is no other binder that will give you the years of satisfactory service that you can get with the John Deere—it's real economy to buy this better machine.

Be sure to come in and see it before you buy.

LOCAL PERSONALS

Mrs. Ray Wilson and her son Joe of Parma were visitors in Ontario Monday. The many friends of the family who knew Joe when they lived here in Ontario had to take two looks to be sure they were seeing the same boy for Joe is nearly twice as tall as he was when he left Ontario.

Eldon Fortier who has been ill for some time with typhoid was able to be up town for the first time on Monday of this week. Though still weak and very thin as the results of his battle with the fever, he is feeling greatly improved and is gradually regaining his strength.

Mrs. Paul Cayou and Mrs. T. B. Fiser spent the week end in Boise. Miss Madeline Hanafin of Shoshone, Idaho, is visiting with her brother Jack Hanafin and his wife who is recovering from an operation at Holy Rosary Hospital.

Some of the young people who returned this week for their summer vacations are Misses Margery and Dorothy Turner, Viola Husted from O. A. C., Robert E. Lees, Edmund S. Fraser, from University of Washington, Seattle, Frank Dorman, from U. of O. at Eugene, Eldon Madden, O. A. C. Frank Dorman and Eldon Madden drove through with the Logan family by way of Brogan.

Mrs. Walter Gramme and Miss Merle Bingham left Monday for Seattle where they will study music at the University of Washington during the summer term.

Edgar Draper, Superintendent of Schools at Bremerton, Washington, returned to Ontario Friday to visit his parents Mr. and Mrs. Frank Draper of this city.

P. J. Russell, a nephew of Mr. and Mrs. Jacob Stroup, is visiting in Ontario over the week end. He is a student at the aviation school in Portland.

Mr. and Mrs. A. L. Sproul left Wednesday in their auto for Long Beach, California. They were accompanied as far as Oregon City by Mr. and Mrs. J. D. Billingsly who will visit their daughter, Mrs. Beatty at that city.

Mrs. Lela Oxman and Mrs. Joe Howry of Vale visited last week with Mrs. John Brosnan and other friends.

Tuesday, June 14, was W. C. F. U. annual Flower Day and thirty bouquets were delivered to the sick at their homes and at the hospital. The Baptist church automobile was donated for carrying these messages of cheer to those who are ill. As it was not possible to send flowers to Frank Winston who is ill at Vale, a card was sent him extending sympathy and best wishes for a speedy recovery.

C. H. Bullen of Portland, an official of the Concrete Pipe Company, was in town over the week end.

Home-made ice cream
—can anything be more delicious?

Easy to make with **Carnation Milk**

Four cups Carnation Milk, 1 1/2 cups sugar, 1 cup water, 1 1/2 tablespoonfuls vanilla. Carnation Milk is always ideal for making ice creams of any sort, because of its purity and richness. Eggs are not needed. For a plain vanilla ice cream, mix the sugar and a cup of the Carnation Milk together and let come to a simmering point; cook for five minutes in this manner; remove from fire; when cool, add remainder of the milk and water, and the vanilla. Freeze. This will make about a quart and a half.

This summer, try making more frozen desserts at home. They are so delightful for warm weather eating, and so much more pleasant to make than cooking hot dishes.

Send for Carnation Cook Book containing 100 practical tested recipes. Carnation Milk Products Co., 506 S. 9th St., Boise.
