

WOOL TARIFF IN NEW BILL 25c A POUND

Importations Will Pay on Scoured Instead of Grease Basis—Big Fight on Lumber Schedule

Telegram Washington Bureau
WASHINGTON, June 23—While the wool schedule in the new tariff is not complete and is one of the primary causes of the delay in getting this measure on the floor of the house, it is now known definitely that the tariff basis for the importation of wool will be on a scoured basis, and not on a grease basis.

Duty 25c A Pound
The duty will be 25 cents per pound, and the American producer of wool will be protected to the fullest extent by this decision.

Lumber and metals are a schedule that the ways and means committee is also having much difficulty with. An effort is being made either to keep lumber on the free list or put it on a retaliatory schedule, which means that countries not levying a duty on forest products of the United States would get free entry for similar products sent across our borders and would have to pay a duty similar to that imposed by them on our products.

In spite of all assurances to the contrary, there appears no prospect of the tariff bill being reported to the house much before July 1, and it will have a stormy passage in both houses.

MARKET COUNCIL FOR FARMERS ORGANIZED

Plans Made to Assist New Organizations For Selling Produce of Oregon Ranches in Markets of County—McPherson Chairman

Oregon Agriculture College, Corvallis, June 23—Preliminary organization of what will be known as

the Oregon Cooperative council, was effected at the close of the conference on cooperative marketing in connection with Farmers' week. The organization was to be completed in room 402 Corbett building, Portland, Monday afternoon. It is predicted that the organization will do much toward furthering Oregon marketing enterprises. The temporary chairman is Dr. Hector MacPherson, director of the bureau of organization and markets at the college, and the temporary secretary, U. L. Upson, manager of the Pacific Cooperative Poultry producers.

The council expects to coordinate the cooperative work in Oregon and map out a general program which can be carried out by all enterprises interested in cooperation. It will assist new associations in making the right kind of a start. Many of them in the past have been formed in a hurry without sufficient funds and with incompetent management.

Aside from these men the council will consist of the following: Geo. A. Mansfield, president of the State Farm Bureau Federation; C. E. Spence, master of the Oregon State Grange; A. R. Shumway, president of the Farmers' union; Robert Paulus, manager of the Oregon Growers' Cooperative association; J. D. Mickle, representative of the Oregon Dairymen's league; R. A. Ward, manager of the Oregon Wool and Mohair Growers' Cooperative association; Vic. H. Smith, manager of the Oregon grain Growers' association; the manager of the Oregon Mint Growers association; a representative of the Oregon Cooperative Hay Growers' association; Paul V. Maris, director of the college extension service; E. E. Faville, chairman of the agricultural committee of the Portland chamber of commerce; a representative of the State Bankers' association, and a representative of any other cooperative association now in existence or any that may subsequently be organized.

See our stock of used pressure tanks before buying. We have some excellent bargains.—H. R. Udick.

WANTED—Sewing at home or by the day. Mrs. L. Harper tf.

FOR SALE or TRADE—Buick Six. Call at Ford Garage. tf.

New or used water systems—we have them.—H. R. Udick.

Built Better—Lasts Longer—Costs Less To Operate

It's real economy in the long run to buy a John Deere Grain Binder. Its stronger construction, the proper application of better materials, and its improvements to insure most effective operation under all conditions are apparent the minute you see it.

JOHN DEERE GRAIN BINDER

Take the main frame for example. Its strong, wide steel bars are widely overlapped and hot-riveted together. The main bearings are self-aligning—there's no twisting of the frame or binding in the bearings.

The wheels are extra high and have wide traction-giving tires. They furnish ample support for the machine and extra traction in wet fields.

The John Deere makes better bundles. Its three packers instead of two insure this. This binder handles extremely short or heavy tangled grain better than others with less clogging and less missed bundles.

Its bundle carrier is the easiest to operate we have ever seen—no particular effort to dump or return to position—it can be adjusted as wear develops to keep it in easy-working order.

The Quick Turn Truck is another feature you will like. It keeps the binder running straight, permits of square turns, takes off side draft from the horses, and because its axle is flexibly mounted, the wheels hold to the ground.

There is no other binder that will give you the years of satisfactory service that you can get with the John Deere—it's real economy to buy this better machine.

Be sure to come in and see it before you buy.

GEO. W. WAYT
