BOB'S BATTING AVERAGE

Babe Ruth is not the only American that is hitting the ball these days. While the mighty Babe with his big bludgeon is drawing down a bigger salary and receiving more popular plaudits than some of his fellow citizens who are engaged in the battles of the day, still all the honors are not due the diamond hero. There should be a little time, and a little thought given to some who though they labor in the less conspicuous field of politics and government are figuratively speaking, "hitting the ball."

Among those who may thus be classed we would cite Bob Stanfield who has forsaken the sheep game for senate, and who so far at least has maintained a pretty good batting average. To date Bob's record reads, two hits and a fan out.

Bob's failure to hit in the last time up is a doubtful matter—an umpire's decision as it were. We do not know whether or not we agree with the umpire—for we do not know whether or not the packers control bill against which Bob spoke had the merit which its proponents allege for it. The record of the various governmental regulation commissions for the past few years has not been so brilliant or so full of fulfillment of implied promise as to merit the belief that the proposed packer control bill would accomplish the objects which the people want.

There is no doubt but that the public would like to see the rapacity of the packers curbed—but how to accomplish that without wrecking is quite another question.

Anyway, even though the umpire would call Bob out on that speech—which is doubtful decision—still his good work in getting the fifty million cattle loan pool started his success in getting the wool tariff at 25 cents per pound on a cleaned wool basis are such solid swats for the betterment of Oregon that they take off any curse that might attach to the packer speech.

TIME TO GET BACK TO EARTH

Unless the United States is to become an asylum for the incubating of troubles with all the nations of the world it is time that the American people, no matter what their parentage may have been confine their activity to American affairs and let other nations alone. It is a disgrace to think that an American Admiral should require a body guard to meet him on the pier in an American city because he happened to discuss an unAmerican subject in a foreign land.

MAKING THE HENS PAY

When the Malheur county poultry raisers learned that they had been receiving an average of 16 cents per dozen less for their eggs than the Willamette Valley poultry men have been receiving one would naturally think that they would immediately proceed to remedy the condition.

The poultry men have no reason to complain of local merchants buying their eggs for the figures that have prevailed. The local market did not justify any other price. There was a surplus for the local market and it was but good business for the local merchants to be guided by the local market conditions. They would not have been good business men had they not done just what they did do.

But likewise it follows that the local poultrymen were not good business men or they would have changed the conditions.

They have in their power the same ability and the same opportunities which the Willamette valley and Washington poultrymen possess. They can organize. They can ship their surplus eggs to the New York

market just as well as can the Willamette valley men. They can—but they don't. That is the entire difference. That spells the difference between success and failure in the poultry business here.

Of course there are other elements. The local poultry men as a whole have not produced as good eggs, nor have they standardized their product and seen that they presented only good clean eggs for the local market. The local dealers have had to take chances, and taking those chances were entitled to the differences in price.

When the entire question of poultry raising in this section is concerned it is a matter of business and it will be good business on the part of the poultry men to organize and get advantage of the marketing organization of the Pacific Poultry association.

KINGMAN KOLONY

Taylor-Spahnower

A wedding of wide interest, and of special interest to citizens of Payette County was that of Miss Velma Elgie Spahnower, only daughter of Mrs. Fairy Spahnower, Fruitland, and Mr. Terrell Theron Taylor, son of Mr. and Mrs. M. H. Taylor now of Gaston, Oregon, former residents of Fruitland and Roseburg. Both families are widely known and because of their prominence the interest of last week centered around the event which occurred at four o'clock Sunday afternoon, June 28th on the spacious lawn of the beautiful home of the bride's mother on Fruitland Avenue.

Promptly at four o'clock the bride's younger brother, Virgil, sang "Oh Promise Me" with Mrs. E. W. Madsen accompanying at the piano. Mrs. Madsen then played Mendelssohn's wedding march. Little Lois Lackey and Fairy Duell with white and pink ribbons formed the pathway of the bride, while Misses Floy Lackey and Amelie Hansen sprinkled rose petals before Miss Katherine Madsen the bridesmaid and the bride who came on the arm of her mother who gave her away to the groom at the foot of the porch steps. The groomsmen were accompanied by the elder brother of the bride, Mr. Floyd Spahnower. The bride was charming in her gown of champagne satin with pearl trimmings, wearing a beautiful long veil of silk net and carrying a shower bouquet of white roses.

Shower For Bride

Friday afternoon one of the very prettiest of the showers given for the bride of Sunday, Miss Velma Spahnower, was that of the linen shower at the home of Miss Iona Johnson when her fourteen pupils of the Prothean Class of which she was teacher, surprised her. After a program and a social time, with Miss Spahnower seated in the center of the floor, two little misses brought in the linen gifts asking the bride to name each and the purpose before unwrapping.

Here's why CAMELS are the quality cigarette

BECAUSE we put the utmost quality into this one brand. Camels are as good as it's possible for skill, money and lifelong knowledge of fine tobaccos to make a cigarette.

Nothing is too good for Camels. And bear this in mind! Everything is done to make Camels the best cigarette it's possible to buy. Nothing is done simply for show.

Take the Camel package for instance. It's the most perfect packing science can devise to protect cigarettes and keep them fresh. Heavy paper—secure foil wrapping—revenue stamp to seal the fold and make the package air-tight. But there's nothing flashy about it. You'll find no extra wrappers. No frills or furbelows.

Such things do not improve the smoke any more than premiums or coupons. And remember—you must pay their extra cost or get lowered quality.

If you want the smoothest, mellowest, mildest cigarette you can imagine—and one entirely free from cigarettey aftertaste,

It's Camels for you.
