

With a HOOSIER you can laugh at the Thermometer

YOUR kitchen is the hottest room in the house. But the HOOSIER makes you so happy, you'll scarcely notice the heat,

Besides, HOOSIER cuts kitchen work in two. You can get out of your kitchen in half the usual time when you own a HOOSIER.

Since \$1 delivers your HOOSIER now, there is no reason why you should go another day without this great kitchen convenience.

GRAIN, CORN AND POTATOES TO BE CERTIFIED FOR SEED

County Agricultural Agent Receives Applications From Farmers For Attention of Crop Specialist

Twenty-two applications have already been filed with the county agricultural agent by farmers of the county asking for certification of seed crops of grain, corn and potatoes. These applications can be filed by any grower who wishes to market a seed crop and secure the advantage of the better demand and higher price usually resulting from having the certification papers issued by the extension crop specialist upon completion of the test. These inspections consist of both field and bin inspections. Grain must pass a field inspection before it is harvested and a bin inspection after threshing. Potatoes must pass a field inspection while the crop is growing, another inspection at digging time and a third inspection in storage. The first inspections are considered crop improvement work by the extension service and are performed free. Later inspections are provided for by means of necessary fees to cover cost of the work. Seed certification work as carried on by the extension service is having a marked effect on the yield and quality of the crops in those sections where it is carried on with the full cooperation of the farmers. Oregon is producing sixty-one varieties of wheat alone. It is believed that not more than ten or twelve of these are good yielding varieties or satisfactory in milling quality. Many times a considerable part of the sixty-one are to be found in one field, all mixed up. This unquestionably results in lower yields and lower prices, because not all of the varieties can be best in yield and besides they do not ripen evenly which cause loss from shattering from the over-ripe grain and loss from immaturity from that which is still green when harvested. Then the price is cut because of the mixture, dockage being taken out. The production and use of certified seed is of distinct advantage to growers and the general territory where it is practiced.

A HOME COURSE IN DOMESTIC SCIENCE

"Twenty Lessons in Domestic Science," by Marion Cole Fisher has recently been received by us for review.

This is a complete advanced course in domestic science and home economics boiled down to meet the requirements of the housewife and the student.

The entire course consists of twenty practical lessons—one hundred pages filled with the most valuable information the housewife can possess—heretofore taught only in domestic science schools.

Do you know the relative value of food, what purpose salads serve, the correct use of condiments, about proper kitchen equipments about U. S. Government's bulletins, how to reduce the high cost of living, how to promote and protect your own and your families health, how to make housekeeping simpler and more economical and pleasant by utilizing modern science in the home.

This book, we note, is priced at \$2.00 per copy and from what we understand it contains a complete \$100.00 college course, condensed, and is practically FREE to every interested housewife.

Write the Home Economics Department of the Calumet Baking Powder Co., 4100-28 Fillmore St., Chicago, Illinois, for full particulars regarding the book and how to secure it.

LOCAL PERSONALS

Mr. and Mrs. Ray Duncan of Ironside, are visiting Mrs. Duncan's mother Mrs. A. Lackey. Mrs. Duncan will stay with her mother two or three weeks.

Dr. B. O. Payne and W. J. Pinney returned Sunday from a five days fishing trip up the north fork of the Little Malheur. They were obliged to go in on pack horses, but caught lots of fish and reported a very good trip.
