**Value**

The permanent wave that is keeping our sales at high tide.

August is supposed to be the slowest month in the clothing year.

And we suppose that if we sat limp and drifted along with the tide we would have lots of time to sit around the cracker barrel and whittle.

Instead of that we are cutting wood—also prices—offering values that are easier to say "Yes" to than to "veto."

Just look at these items—things you could get along without if you had to pay regular prices.
