The Mourning After

THERE were 5,250 similar accidents during the year 1920 in the United States, killing 1,273 and injuring 3,977 persons, and an increased number during 1921. When statistics are available for November 1921 it will show that month as being one of the worst in history. Isn't it about time automobilists were coming to a realization of the necessity for stopping before proceeding over railroad grade crossings, not only for the safety of themselves, but also occupants of their cars whose lives they have in their hands, as well as persons on trains. The great number of accidents occurring would indicate that travelers on public highways misjudge the speed of trains and do not look for them in both directions. Many accidents occur by reason of the fact that automobiles proceed over crossings after a train passes without knowing whether or not another train is coming in the opposite direction.

STOP, LOOK AND LISTEN for trains on all tracks before attempting to cross.

OWYHEE

A drainage meeting was held at the school house Wednesday evening. It is almost time for some decisive action to be taken in regard to drainage.
