

VALLEY VIEW

H. Noah and wife, who spent the winter in California, have returned to their ranch on the boulevard road just north of D. W. Dean's. They expect to build a new home in the near future.

Mr. Sloop from Portland has purchased the Barrows-Ordway ranch and will move there July 1. This will necessitate Mr. Albee's moving although arrangements may be made so he will continue as foreman of the ranch. The ranch employs about sixteen men regularly, and extra help during having and harvesting.

A. F. Burr has been quite sick for nearly two weeks with the Flu, but is able to be out again.

Mrs. T. Penn and the oldest son, Stanley, were sick with the Flu last

week and Mrs. Penn and Marshall are sick this week.

A. R. Albee and family, Mr. Snyder and family, Miss Agness Amidon and J. Stoneman attended the Odd Fellows picnic at New Plymouth last Friday.

On Sunday A. R. Albee and family, Frank Henry and family, Mr. Snyder and family, Agness Amidon and John Stoneman autoed to Mea orchard, and from there to Council, Idaho, where they enjoyed a picnic dinner.

About thirty people spent Sunday along the river on the Burr ranch, enjoying the shade.

Potatoes in this neighborhood are looking fine and are in bloom. A number of buyers are canvassing the growers and prospects for selling at a good price are promising.

At the annual school meeting held Monday, June 19 at the new school house A. S. King was elected new director and Mrs. Flora Shaffer re-elected clerk. Bids for the old school house will be open Saturday, July 1. The teachers chosen for the coming year are, Mrs. Anna Andrews, who taught at Fruitland last year, for the higher grades; and Miss Marnagat Griffin for primary grades.

NOTICE

Notice is hereby given by the School Board of District 30 to any person having a claim against the Valley View School Building either for material of labor, to present such claim to the District Clerk by July 1, 1922.

THE PUBLIC FORUM

The Argus welcomes communications from its readers or other citizens of this section. Such communications should be limited to 300 words and will be printed if they do not contain libelous, personal or other objectionable matter. The fact that a communication appears in this paper does not mean that it reflects the ideas of the publisher, and no responsibility for the views is assumed. All communications must be signed or they will not be printed.—The Editor.

Westfall, June 18, 1922.

Editor Ontario Argus, Dear Sir:

"I noticed in my last Argus that Mr. Claggett made mention of an editorial in your paper of June 8th which from some cause of other did not reach us. I would appreciate the favor if you would send me a number of that issue if you have any left, as I read every editorial in all the papers which come to our place. I am rather enlightened on this matter where Mr. Claggett tells us in his letter published in your last Argus that this county does not pay the wages of our "County Agent", all it pays is the running expenses of carrying on the work, which this year amounts to \$2500, and his salary really is paid by the state. But where does the state derive the money from—only from the taxpayers of the state. So where is the difference, whether the county pays our county agent direct or thru the state treasurer? The effect of which is all the same upon the over-burdened taxpayers of this county. As I am able to figure it up, it amounts to \$5200 dollars per annum, double the amount of what I thought it would be, according to my information concerning this matter—a considerable addition to the already ruinous burden of our taxpayers. I have nothing personal against our county agent. I am told he is a fine, live young fellow, and do not blame him for holding an easy job.—I only wish I could get his job, it beats cow-punching.

Respectfully,
Charles Becker.

NOTICE TO CONTRACTORS

Sealed bids will be received by the County Court of Malheur County, Oregon, at Vale, Oregon, on the 3rd day of July, 1922, at 11 o'clock a. m. for the grading of 2 miles and gravel surface on 2 1/2 miles of the Nyssa-Jordan Valley Market Road on the Nyssa-Adrian section, commencing at station 440 and ending at station 642, according to plans and specifications on file in the office of J. F. Joyce, Engineer, at Ontario, Oregon.

This work consists of—
3551 yards of bank run gravel.
14561 yards of common excavation.
288 lin. feet 18 inch iron culvert.
18 cubic yards class C concrete.

No bids will be considered unless accompanied by a certified check for five per cent of the amount of the bid.

A satisfactory bond will be required for fifty per cent of the amount of the successful bid, for the faithful performance of the contract.

The right is reserved to reject any and all bids.

By order of the county court of Malheur County, Oregon, this 19th day of June, 1922.

H. S. SACKETT,
County Clerk.

What about carbon?

Chemical analysis shows that all lubricating oils are composed of about 85% carbon and 15% hydrogen in chemical combination.

All lubricating oils form carbon when burned in the combustion chamber. The important thing to determine is the amount and kind of carbon formed by the oil.

Some oils form a good deal of carbon, some a small amount; some produce hard, flinty carbon which will cause a great deal of trouble; others produce a soft, flaky carbon that will do no damage.

The important factors determining the amount and kind of carbon formed by a lubricating oil are the crude from which it is made, the process and care of refining it, its purity and stability.

Advantages of Crude and Vacuum Refining

Great care is exercised in selecting the crudes from which Zerolene is made, to secure only those which contain the most desirable lubricating values and at the same time as little as possible, if any, of the undesirable hydrocarbons such as wax and asphaltum.

In selecting crudes for Zerolene, the Standard Oil Company has the advantage of its own large production of practically every type of crude oil. For this reason the company is not compelled to use any particular crude because it happens to be the only one available.

These selected crudes, carefully refined by our own patented, high-vacuum process, produce in Zerolene, oils of the highest lubricating value, which, when burned in the combustion chamber, develop a very small amount of carbon of a soft, flaky nature, which can do no harm and usually blows out entirely with the exhaust.
