

Successful Graduates Are the Best Recommendations of O. A. C.

This institution offers a thorough, practical, and standard education at a cost within reach of the high school graduate.

- | | |
|---|------------------------------|
| It offers training for collegiate degrees in: | Mines |
| Agriculture | Pharmacy |
| Commerce | Vocational Education |
| Engineering and Mechanical Arts | Chemical Engineering |
| Forestry | Military Science and Tactics |
| Home Economics | |

It offers training also in: The School of Music, Physical Education, Industrial Journalism.

Fall Term Opens September 18

Stability starts with the crude

One of the most important requirements of a good motor oil is that it possess stability—that is, that it maintain its chemical composition and its lubricating body under all conditions of engine operation.

If an oil changes its chemical composition—"breaks down"—at high operating temperatures, it can no longer maintain a lubricating film between the bearing surfaces, and its value as a lubricant is destroyed.

Certain crude oils possess a higher degree of stability than others. Because of its large production of practically every type of crude, this company is free to choose for the making of Zerolene only those crudes which are particularly adapted for the purpose.

The Patented Vacuum Process

In the process of distilling and refining these selected crudes, it is of the greatest importance not to destroy their natural "oiliness" and stability. For this reason we employ our own patented high-vacuum process exclusively. By this process the oil produced—Zerolene—retains all the natural "oiliness" and stability of the original, selected crude from which it is made.

No other refiner on the Pacific Coast uses any form of vacuum distillation. No other refiner in the United States uses as high a vacuum as this company.

Zerolene of the correct grade for your car gives perfect lubrication and permits the development of maximum power, speed and gasoline mileage.

more power & speed ~
less friction and wear ~

SUMMONS

IN THE CIRCUIT COURT OF THE STATE OF OREGON FOR THE COUNTY OF MALHEUR

Joel Looper and Bryant Looper, Plaintiffs

vs.

K. S. D. Fruit Land Company, a corporation; Albert Bellisle; Henry Bellisle; Mary Ann Bellisle; Albert J. Appell; Julia Kiesel; Wilhelmine Pauline Shearman; Mary A. Thompson; Fred W. Kiesel; Etta Johnson; Minnie Neece; Lillie Ambrose; Anna Dale; Charles L. Thompson; Robert A. Thompson; Jesse E. Thompson; Mabel Morgan; Charlie Bracewell; Gerald Bracewell; Robert Bracewell and Vera Bracewell, Defendants.

To Mary Ann Bellisle, Albert J. Appell, Etta Johnson, Lillie Ambrose, Mabel Morgan, Charlie Bracewell, Gerald Bracewell, Robert Bracewell and Vera Bracewell, being nine of the above named Defendants.

IN THE NAME OF THE STATE OF OREGON, You and each of you are hereby required to appear and answer the complaint filed against you in the above entitled suit on or before the expiration of six weeks from the date of the first publication of this summons, the same being the last day of the time prescribed by order of the court directing service of summons in said suit to be made upon you by publication; and if you fail so to answer, for want thereof, the plaintiffs will apply to the court for the relief demanded in said complaint, to-wit:

For a decree of said court quieting plaintiffs' title to the following described tract of land situated in Malheur County, Oregon, to-wit: "Commencing at a point 1335 feet West and 30 feet North of the Southeast corner of Section 7, Twp. 19 South, Range 47 E. W. M., and running thence North 1133.35 feet, thence East 265 feet, thence South 1133.35 feet, thence West 265 feet to point of beginning, and embracing and including therein what has heretofore been known and described as Lots 1, 2, 3, 4, 5, 6 and 7, of Block 13, and all of Block 14, in the Village of Arcadia in Malheur County, Oregon; and adjudging that you and each of you have no right, title, estate or interest in said lands, and that plaintiffs' title to the same is good and valid, and for all other relief demanded in said complaint.

You are further notified that this summons is served upon you by publication in pursuance of an order of the Hon. Dalton Biggs, Judge of the above entitled Court, which said order was made and entered in said cause on July 13, 1922, and directed that this summons be published once each week for six successive weeks in the "Ontario Argus". The date of the first publication of said summons is on July 13, 1922, and the last publication is on August 24, 1922.

WELLS W. WOOD, Attorney for Plaintiffs. My residence and postoffice address is Ontario, Oregon.

BONDS CALLED FOR PAYMENT MALHEUR COUNTY SCHOOL DISTRICT NO. 8, OREGON

Notice is hereby given that the total remaining outstanding block of an issue of \$46,000 bonds of the above-mentioned school district, dated April 1, nineteen hundred and eleven, due April 1, nineteen hundred and thirty-one; optional for redemption on and after April 1, nineteen hundred and twenty-one being bonds numbered 1 to 92, inclusive, in denominations of \$500 each are called for payment and will be paid on and after September 1, nineteen hundred twenty-two at the County Treasurer's office at Vale, Oregon, and no interest will be allowed after September 1, nineteen hundred twenty-two.

W. L. TURNER, Clerk, Malheur County, School District No. 8, Oregon.

First publication July 27, 1922
FOR SALE—62½ acres under Warm Spring Project three miles west of Ontario, known as Springer ranch, \$600.00. Write Geo. H. Foster Co. Baker, Oregon. May 25—Aug 31 pd.

The first notice hereof is published in the Ontario Argus, this 3rd day of August, 1922.

ANDREW W. HOWARD, Administrator of said Estate. BROOKE & GALLAGHER, Ontario, Oregon, attorneys for estate above named.

FOR SALE—five acres on hill 3-4 mile from High School under advancement Co. ditch with water right. Fine place for chickens or garden. All good soil. Price \$600. Inquire W. H. Doolittle Trustee.

MARRIAGE MADE A BUSINESS

Practice in France That Can Hardly Be Said to Savor Much of Romance.

Anyone can marry—anyone, everyone!—if they have a business manager who knows the business.

Since the war, in France, weddings have doubled, births increased and deaths declined in the most astonishing manner.

Now, as all know, marriage does not necessitate a business manager—the old helter-skelter way of falling in love by hazard will undoubtedly continue very much in vogue; but if anyone imagines that marriage is not moving with the times and yielding to business organization, they know little of what is happening in France today!

Never before have girls done such marrying in France—with available bridegrooms so reduced in number! What is more, this organized promotion of marriage gives every girl a chance—despite handicaps of unacquaintance, social disadvantage, plain looks, lack of money, lack of family, lack of pushing friends to aid the match.

Your business manager's your pushing friend!

Helps girls to marry?

Helps men, also.

Perhaps even, more so. . . .

You will object.

And—romance?

"But the quality, monsieur, think of the quality!" said madame. "Durable sold, the best mark in France! Before the young folks are allowed to meet, both had been investigated, weighed compared and balanced by social experts and the pairing-off O. K.'d in final conference! Now, there's a marriage that will last. It's got good wear in it!"

PARROT FISH ODD CREATURE

Must Have Been Devised When Mother Nature Was in Unusually Freakish Mood.

If some one asked you, "What is that which has a beak like that of a parrot and cheek pouches like those of a monkey, lives in the sea and chews the cud like a cow?" you might imagine it was some kind of catch-riddle. Yet there is a creature which answers this description perfectly. It is called the parrot fish.

The upper and lower jaws have become hardened into a sharp, curved beak, which is just the tool required for lopping off lumps of tough weed. Each piece snipped off by the beak is passed into one of the two curious pouches which adorn the cheeks, and there it remains until the parrot fish feels that he has collected enough to make a good meal.

He then lies on the bottom and chews the cud by means of the splendid set of teeth which nature has placed, not in his mouth, but in his throat.—Exchange.

Time's Changes in England.

The poacher, the trespasser, the man who by accident lets his pigs or helters out upon the public road, the urchin who robs an orchard, and many minor rural "malefactors" are, it is generally claimed, being more personally dealt with by modern country magistrates, in England. The abolition of the old-time benches of squires and landowners, whose right to be made justices of the peace was almost regarded as hereditary, and their substitution by men of integrity in every walk of life, and now by women, has wrought a change in rural police court justice which the country mind understands and appreciates to the full. On a country bench recently, a prominent landowner, his agent, one of his laborers were all adjudicating together.

A Kind Wish.

When Jean went to her little neighbor's to visit she often talked to the grandmother of the house. "I have a grandmother, too," she would say, "but she's in heaven."

And she and the grandmother of the house were good friends until one day the grandmother was cross. She scolded the two little girls for leaving the screen door open, for walking in a flower bed and dropping crumbs on the floor.

The two youngsters sought refuge on the porch. Grandmother started to follow them there a little later, to try to make up. She realized the necessity of doing so, for when she reached the door she heard Jean say: "Ruth, I wish your grandmother was visitin' my grandmother today."

Still Shrouded in Mystery.

Mary and her little brother were playing in the back yard.

A worm came to play its humble part in their lives, too.

"Oh, Mary," he cried, suddenly. "I have found a worm!"

A robin looked enviously from a tree.

"Oh, Mary," the child exclaimed, "is a worm good luck? Say, Mary, is a worm good luck?"

Mary replied, but her voice was quiet, so that I do not know yet whether a worm is good luck or not.—Washington Star.

Husbands They Would Like.

Half of the women enrolled at the University of Wisconsin are willing to marry a man on a salary of \$2,500 a year, according to a report issued by the statistics committee of the university. An average of one cooed out of seven wants a husband with a salary of at least \$5,000 a year, while one cooed demanded a \$20,000-a-year husband.

SIXTY FARMERS HEAR SEED EXPERT LECTURE

Buckthorn, Marshelder and Alfalfa or Sweet Clover Mixtures

Over sixty farmers gathered at the Grange hall at Cairo last Thursday evening to hear B. F. Sheehan, who is secretary of the Western Seed Growers Marketing Company, sales agent for the Idaho and Utah cooperative seed growers associations, speak on clover seed growing and the grading and marketing of it.

The gentleman has had a wide experience in the seed line and is familiar with production problems over a number of states and under varied conditions. He is familiar with Malheur soils and climatic conditions from several years observations and is very positive that this section is a superior clover seed country, capable of producing high yields and superior quality. He believes that clover is more profitable than most of the crops now being grown by the majority of the farmers.

The speaker dwelt at length on the absolute necessity of avoiding the common mistake of over half of the farmers in Idaho—that of planting foul seed which will immediately lower their grade and render their land almost permanently unfit for the production of high grade seed because of the weed seed living in the land for years afterwards. He cautioned particularly against dodder, saying that 33 states in the Union now make it unlawful to sell seed containing dodder and that the price of clover containing even a little dodder is certain to be much less than pure seed. He also mentioned buckthorn as a very serious weed and advised growers to beware of foxtail, watergrass, marshelder and mixtures of alfalfa and sweet clover. "Trust no seedmen whatever, but always have a state test of the seed you buy before you put it in the ground. This will cost you nothing but a two cent stamp to send a sample to your seed laboratory at Corvallis or to the Idaho Seed Laboratory at Boise. . . . Then you are safe, but if you buy without the test you may have an experience like a man who bought seed last fall from a dealer who said it was pure and it later turned out to contain 18000 dodder seeds per pound, after having passed up seed offered by another dealer who was honest and informed the farmer that it contained 12 dodder seeds per pound, said the speaker.

"If you have dodder in your field, then the only thing to do is to get in there at once and cut it out, pile it on the spot and burn it as soon as dry." Care should be taken to get all of the tendrils as they are often spread out farther than will be noticed. If even a small piece is left it will grow and make a large patch in the field before harvest. A little straw or kerosene will help to do the burning. Certain weeds such as China lettuce and pig weeds are not serious, as their seeds can be separated from the clover quite readily.

The speaker advocated fall seeding as the most successful practice for this section. This is accomplished by drilling 8 to 10 pounds of seed per acre with a double disc drill into clean, grain stubble during the month of August and irrigating it up by the first of September. Some very good stands have been secured by seeding up to the 20th of September, but earlier seeding is best as it gives the plants time to make a strong growth in the fall.

The first season after planting, a crop of hay can be taken in June and a crop of seed in September. The second season, the first crop should be taken for seed and the second again for seed if it makes. Otherwise it may be used for hay, pasture, or the land plowed for fall wheat. It is considered advisable to delay irrigation somewhat the first spring in order to force the plant to root deeply, water being applied when the plants begin to show need of it by wilting in the afternoon and as needed thereafter to produce a good crop of hay. After the hay crop is cut it is also considered advisable to delay irrigation somewhat until new growth has started, whereupon a soaking irrigation should be given. If needed, the water should be run lightly over the field when the plants are in full bloom and another light irrigation when the seed is filling. The variation between soils, however is sufficient to make it necessary for every grower to study his conditions and seek to apply water in the way that gives him best results, rather than follow a fixed rule.

Mr. Sheehan said that the clover

growers of Malheur county were going to be invited to join the Idaho Seed Growers association and pool their seed with the Western Seed Growers Marketing company and that as soon as the membership was about completed, meetings would be held in the different communities to elect committeemen to have charge of the affairs in this district and to represent the Malheur county growers on the board of directors. He arranged with S. B. Conklin to attend the membership work.

GUARDIAN'S SALE OF REAL ESTATE

Notice is hereby given that under and by virtue of an Order of Sale, duly made and entered by the County Court of the State of Oregon for the County of Malheur, on the 29th day of July, 1922, in the matter of the Guardianship Estate of Newton F. Zahler, a minor, the undersigned guardian of said minor will, on and after the 9th day of September, 1922, at the law office of Wells W. Wood in Ontario, Oregon, offer for sale, and sell at private sale, in one parcel, for cash in hand, subject to confirmation by said County Court, the following described tract of real estate owned by said minor, to-wit:

The North-east Quarter of Section Thirty-one in Township Sixteen South, Range Forty-four East W. M., in Malheur County, Oregon.

Done and dated and first published this 10th day of August, 1922.

ANNIE E. CARLILE, Guardian of the estate of Newton F. Zahler, a Minor.

Last publication September 7, 1922.

FARMERS WANTED—to lease desirable alfalfa and grain Ranches under irrigation. Ample water, no maintenance charge, good roads and schools, Liberal contract. Will rent for one, three and five years with privilege to buy. We want bona fide farmers who want to make all there is in it. Must be properly equipped and come well recommended. A CHANCE TO GET AHEAD. Call on or write. H. D. Elsmann, Mgr. Malheur Land Co., Jamieson, Oregon. 35 ft.
