

# At 3000° F- What?

As your motor begins to "warm up," what happens to the oil? It thins, of course. But just how does it thin and how does it act when subjected to the high operating temperatures?

Upon the answer to that question depends the proper lubrication of your car.

Zerolene, being made from selected crudes and scientifically refined by our patented vacuum process, resists engine heat; it retains its lubricating "body" at all operating temperatures. It does not decompose or "break down." It clings to the bearing surfaces and maintains a perfect film of lubricant.

### A Minimum of Soft, Flaky Carbon

If the motor is getting proper lubrication, some oil slips past the pistons and is consumed by the flame of combustion. In burning, all oils deposit carbon on the cylinder walls and cylinder heads. Inferior oils deposit a hard, gritty carbon in considerable quantity.

It is this hard carbon deposit which causes pre-ignition, breaking and sticking of cylinder rings, overheating, loss of power, warping and splitting of exhaust valves, and wear of valve stems.

Zerolene deposits a minimum of carbon of a soft, flaky nature which can do no damage and is usually blown out with the exhaust.

Lubricate exclusively with Zerolene, adopting the recommendations embodied in the Zerolene chart of recommendations, and you will develop the maximum power, speed and gasoline mileage of your car.

### CLUB NOTES

**Big Bend Corn Club Has Field Trip**  
The Big Bend Corn Club spent Friday afternoon in visiting the fields of each member. Every member is raising an exceptionally good crop this year, and from all indications a few of the ribbons at the State Fair in September will be in possession of the boys.

Volney Hickox has an acre of yellow dent. The stand is very good and the ears are well filled. Gerritt Muntzeworf also has an acre of yellow dent from which he should be able to select a good ten ear exhibit for both the county and state fair. Wilbur, Wesley and Dyre Roberts, who carried off first, second and fourth prizes at the state fair last year, are into to game again with a half acre of yellow dent. Lee Johnston is raising an acre of Silvermine. He is the only member in the club raising white corn. Ira Brumbaek, who won first prize at the county fair two years ago, is again back in the club work after a year's absence, and is going to furnish competition at both the county and state fairs this year. Archie, Elmer and Carl Parker each have an acre of yellow dent. They proved beyond a doubt that they could raise good corn last year, and their fields are looking even better this year. This is Dean Grant's first year in the Corn club, but his field is comparing favorably with the fields of the veteran club members. Dale Robinson was in the mountains and could not be present but even a casual glance at his corn would convince anyone that it had received the best of care.

This group of boys, under the leadership of V. D. Eachus, is one of the real live clubs of the county.
