**FARMER SHOULD GROW  
MORE FOOD AT HOME**

Washington, D. C.—Farmers should produce more of their own foodstuffs and buy less that must be brought to them by railroad, according to a survey of opinion among 25,000 farmers made public by the department of agriculture. Nearly 30 per cent of the food consumed by farmers and their families generally is not grown by them or in their immediate vicinity, it was shown, whereas it was estimated that 79 instead of 70 per cent of their needs could be produced locally.

High freight rates, it was explained, tend to reduce the prices farmers receive for their products and increase the cost to them for the things they buy from outside localities.

**TAX SERVICE EXTENDED**

Assistance to Be Given in Every County in Filing Returns.

Washington, D. C. — The advisory service offered by the bureau of international revenue to assist taxpayers in preparing their income in preparing their income tax returns for 1922 will be extended after the first of the year to every county of the country, instead of being confined to cities and large towns. The period of filing returns is from January 1 to March 15.

Schools for the instruction of deputy collectors are being held in the various collection districts throughout the country. Experts on the individual income tax law and regulations who have been engaged in similar work in Washington are the instructors.

Case Against W. A. White Dismissed.

Emporia, Kan. — The state's case against William Allen White, Emporia editor, charged with violating the industrial court law by placing a placard in the window of his newspaper, was dismissed in district court. The case will be dismissed on the application of the state at its cost.

Denby Wants Strong Navy.

Washington, D. C.—A general naval policy providing for a navy "second to none" and strong enough to support American policies and commerce and guard American continental and overseas possessions was laid down by Secretary Denby in his annual report to congress.
