Wire Communication—Five Miles of Northern Pacific Is Under Water—Once Brought on the

WASHINGTON, Wash., Nov. 28—Bells rang at the Bellingham depot and steam whistles blew across the Puget Sound coast this morning as a result of the tremendous storm which has been raging for the past few days. The Bellingham, Wash., and Seattle railroad here has been closed for the past 48 hours and there were no trains at the Bellingham station. The westbound trains from the south stopped at the station and were held there until the next day. The eastbound trains from the north were held in the same manner. The Bellingham and Seattle railroad is one of the most important routes in the state and it is feared that it will be closed for several days. The water level at the stations is now over 25 feet above the normal level.
