Electric Power For pumping water to your trees, lawn and household purposes. Why is it Taking the Place of all Other Means of Power? Convenience A snap of the switch button—the motor will do the rest, without attention. Safety No high explosive or dangerous pressure to watch—merely a silent force, never tiring, but which a child may operate. Economical Because of the small cost of operation, compared with other power. It is within the reach of every one, and wherever electricity is obtainable electric power has become the standard of the world.

SEATTLE CAPITALIST WOULD BUY LAND

Representative Looking Over P. L. S. Company Lands—Was Pleased With Vale and Vicinity R. Ulrich, a Seattle man, spent a portion of this week in this section looking over the P. L. S. company land holdings and inspecting the Silver creek irrigation project being promoted by Messrs. McConnell, Cole Bros. and Associates. Mr. Ulrich secured much information and data on the Pacific Live Stock holdings and also visited the Silver valley reservoir site. He discussed the possibility of purchasing the big land holdings of the company with Assistant Supt. Holland and intimated that he might secure capital to buy the land and also take up the Silver Valley irrigation scheme that would control the water and irrigate the great Harney valley. This is a project of much magnitude and should Mr. Ulrich succeed in interesting capital it would mean great things for this section.—Burns Times-Herald.
