THIS IS THE NEWSPAPER AGE

The invention of movable types occurred a trifle less than 500 years ago. These 500 years have witnessed infinitely greater progress than the world had made in all the thousands of years previous. Printing has been the most considerable factor in this progress.

The Newspaper of today reaches and influences more people than any other form of the printed page.

It covers the fields devoted to all other kinds of printing. They are special. It is Universal.

This is the newspaper age. The press is the most potent factor in modern civilization. All the other factors have existed before in some form. Only the press is new. At its advent began the modern era.

The man without a newspaper is a citizen of the middle ages set down in the twentieth century.

He is as much out of date as the dodo, as much out of place as a bat in the sunlight, as much outclassed as a Roman galley by a modern ocean liner, as sure to be outdistanced the ox cart. Subscribe for The Malheur Enterprise and keep posted on the development of Malheur County.
