## FINE WOOL CLIP IN BARREN VALLEY

Sheep in Good Condition--Crop Prospects Good--Other News

Crowley, Ore., May 20, 1912--Sheep shearing at the Gwinn & Anderson plant has been delayed by the recent rains. There are about 40,000 to shear at the Road Canyon plant. They have finished the Venator sheep and are shearing the Turnbull & McEwen sheep now. Crops are fine and everything is flourishing here in the valley and nature seems to be smiling on the residents of this section again.

H. L. Anderson and wife are at the Crowley again after a long absence and everyone is glad to welcome them back, as their genial faces are greatly missed when not here.

The reservoir is full and overflowing and the company ranch is fast becoming one of the finest places in the county as well as the most productive and best improved.

Frank Loveland is here from Ontario. He brought up one of the finest Shire stallions that ever came to Eastern Oregon. He and Chas. Cook and Win Seaward are busy rounding up horses.

Mr. Mason, Mr. Gallagher and Mr. Clement have returned from Tacoma to their homesteads.

M. B. Given is here rusticking and looking after business as well.

A force of men are repairing the roads, as the late storm did great damage to them.

The sheep men of this section find that after marking, that their lambs are not hurt as badly by the late storm as first thought. All have a fair average of lambs and a fine clip of wool.

Thos. Turnbull is at the plant looking after his sheep shearing.

Henry Wessen has resigned his position on the Venator ranch and returned to his place near Weaverly in Harney county.

Gail Eckerman has ordered a thrasher to take care of the Barren Valley grain crop this year.

Your correspondent hopes that the suit enjoining the county from paying the appropriation for the Malheur Co. fair will not effect the fair to any great extent, as it takes a live town like Ontario to maintain a first class fair.

The Ontario people are sure live ones when it comes to doing things right and advertising the resources of the county in a practical and profitable way.

Now is the time to get rid of your rheumatism. You can do it by applying Chamberlain's Liniment and massaging the parts freely at each application. Sold by Vale Drug Store.

## NEW DRAINAGE SYSTEM PLANNED FOR ONTARIO

Power Site for High Dead Ox Flat -- An Additional Water Supply is to be Furnished the City--Many New Settlers are Arriving in This Section

Ontario, Oregon, May 22.--H. E. Harer has been employed as consulting engineer to work out a feasible drainage system for the City of Ontario. He has completed the preliminary survey, and will present his recommendations to the city council next week. Its purpose will be to provide drainage for the entire west portion of the city. It will provide storm sewerage as well as sanitary.

President Homan of the Commercial Club has gone to Washington, D. C. to get relinquishment from the Interior department for a power site on Payette river. This plant is intended to generate power for the owners of land on High Dead-Ox-Flat. The water will be taken from Snake river and lifted 225 to 300 feet.

The Idaho-Oregon Electric Light & Power Co. are sinking a deep well to filter water from Snake river to supply the city. The demand for city water is now beyond the supply of the present wells.

D. B. Cook & Cook, brought in a live delegation from Portland this week. He purchased a 160 ranch from W. H. Doolittle.

The people of Payette have bought a road machine, and intend doing extensive macadamizing in and about the city of Payette.

Mayor Trow and W. H. Doolittle went to Vale and Willow River Valley Tuesday.

## ONTARIO NEWS OF PAST WEEK

Ralph Weaver and wife, Dr. Frye, and Mr. Storkman the Ontario cigar man, drove to Vale Friday night in Dr. Frye's automobile and had a pleasant drive over the good road to the county seat.

C. E. Kenyon, Albert Butler and Oliver Nicely, all of Ontario, passed through town last Saturday on a fishing trip up the Willow river.

T. Arnold who was recently operated upon at the Holy Rosary hospital, by Dr. Prinzing, is improving nicely.

## MALHEUR CITY NEWS

D. K. Worsham of Malheur came down to Vale Monday night, accompanied by Dr. Taylor. He made the trip by auto in four hours. He reports work progressing finely on his placer gold mine "The Quartz Gulch." Plenty of water, with prospects looking better than ever before.

Fred Johnson, one of the owners of the Drexel Mining Co. is still prospecting on their claims. Parties from Denver were there last week looking over the properties with a view to purchase. They took samples of quartz back with them and expect to return to Malheur in the near future, when they will consider further the matter of taking over the Drexel holdings.

## "KITCHEN SHOWER" GIVEN EMMETT TEACHER

Emmett, May 18.--The pretty home of Miss Fairchild was the scene of a very clever surprise on Miss Church, one of Emmett's popular school teachers, on Wednesday evening. Miss Church's engagement to Mr. Orr was recently announced and her friends gave her a "kitchen shower." Mr. Orr is district manager of the Idaho Oregon Electric Light & Power company and while both the young people have been here only about a year they are popular and have a host of friends. The marriage will take place early in June.

## PORTER'S DEAD OX PUMPING PLANT IS COMPLETED

The pumping plant of O. W. Porter which has been under way for several months is now entirely completed and started working Tuesday. Everything worked to satisfaction from the start and aside from the ditches being a little small it is a success. However the ditches will widen as the water flows making them the desired width. Engineer French was in charge of the work.

There never was a time when people appreciated the real merits of Chamberlain's Cough Remedy more than now. This is shown by the increase in sales and voluntary testimonials from persons who have been cured by it. If you or your children are troubled with a cough or cold give it a trial and become acquainted with its good qualities. For sale by Vale Drug Store.

## MORMON BASIN WILL HAVE ELECTRICITY

John Arthur, while in Baker on Monday from the Humbolt mine in Mormon Basin stated that the property was showing to advantage, and would in all probability be running full blast before long. The mill will start about the first of June. Mr. Arthur is making arrangements while in Baker for the hauling of wood for their mill. It is quite probable this part of the operation will be eliminated soon by the establishment of electric power in the Mormon Basin.

"I am confident," stated Mr. Arthur, "that the power will be in this year. We have already signed a contract with the Idaho-Oregon people for electric power, and a contract with those people means business. They already have an investment of several million dollars in the state of Idaho and have 10,000 horsepower to sell now." It is quite possible that this is the company that will supply a great many of the mining properties in the eastern part of the state. The United States Mining, Milling and Smelting company owners of the Rainbow mine, signed a contract for power with these people some time ago which with that of the Humbolt contract will insure electric power for practically all of Mormon Basin. The agreements with these properties have been pending for some time and came as a result of a conference with the officials of the two properties with a representative of the Idaho-Oregon company several months ago.

Jim Lawrence returned from a few days trip to Ironside this week. He states that there is an abundance of water there this spring more than for several years past. He reports crop prospects good. Conditions in this section have never been better.

McFadden & Zutz, of the popular Assembly Pool hall, have just had a fine electric sign installed at their place of business.

## MORE DEAD OX FLAT LAND TO BE IRRIGATED

Contract was let last week according to the American to put in a pumping plant to water 2,600 acres of land at the lower end of Dead Ox Flat. The plant is to cost about \$40,000. The land is near Weiser and is already under cultivation as dry farm land. It is the equal of the best. Water is to be ready for the land by September.
